1 Jiří Kaván (1877–1933)

Jiří Kaván was astronomer at the Astronomical Institute of the Czech University at Prague and in 1919, he was appointed director of the astrophysical observatory in Stará Ďala, now Hurbanovo in Slovakia. He retired from the directorship in 1927 and died in 1933.[1]

2 Kaván's table (1934)

Kaván's table was first published in Czech in 1934 [9, 1]. According to the preface of the English translation of Kaván's table published in 1937 [10], the table was started in 1917. During the first year, Kaván worked with Dr. V. Zelinka and Miss B. Zubatá and computed the multiples of all prime numbers from 2 to 2909 and of all their powers. The checking, printing and proof-reading were done in the years after 1918. The cost of printing the tables was covered by the publication fund of the observatory of Stará Ďala.

Kaván's table gives the complete decomposition in simple factors of every integer from 0 to 255999. It was apparently the first table giving complete decompositions beyond 100000. Each page covers 500 integers and the whole table spans 512 pages. Each line of a page gives the decomposition of ten integers, in a straightforward way. Numbers which are prime are marked in bold face.

As explained in Arthur Beer's introduction to the table, the table was checked against Inghirami's table [7] (probably the 1919 edition [8]) for numbers up to 100000, against Goldberg's table [6] for numbers up to 251647, and against Chernac's table [3] for every decomposition.

3 Links with other tables

Peters' table [13] is very similar to Kaván's table and was published at almost the same time. But it gives only the complete decompositions up to 100000.

Henry E. Merritt used Kaván's table for his table of "useful numbers" [12]. Merritt's table gives the decomposition of numbers whose factors are greater or equal to 7 and lower or equal to 127, from 1 to 200000.

[1] A brief biography of Kaván precedes his tables [10].

The following list covers the most important references[2] related to Kaván's table. Not all items of this list are mentioned in the text, and the sources which have not been seen are marked so. We have added notes about the contents of the articles in certain cases.

[2] **Note on the titles of the works:** Original titles come with many idiosyncrasies and features (line splitting, size, fonts, etc.) which can often not be reproduced in a list of references. It has therefore seemed pointless to capitalize works according to conventions which not only have no relation with the original work, but also do not restore the title entirely. In the following list of references, most title words (except in German) will therefore be left uncapitalized. The names of the authors have also been homogenized and initials expanded, as much as possible.

The reader should keep in mind that this list is not meant as a facsimile of the original works. The original style information could no doubt have been added as a note, but we have not done it here.
