Tibor Kalman, Eveline Wandl-Vogt. DARIAH-ERIC Towards a sustainable social and technical European eResearch Infrastructure for the Arts and Humanities. e-IRG Workshop, Nov 2014, Rome, Italy. hal-01081479

HAL Id: hal-01081479 https://inria.hal.science/hal-01081479

Submitted on 12 Nov 2014

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

DARIAH-ERIC

Towards a sustainable social and technical European eResearch Infrastructure for the Arts and Humanities

Examples on the latest trends 2014 Arts and Digital Humanities

Arts

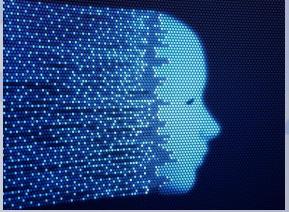

Example 1: Media art

existing prototypes
to be connected
e.g. Archive of Digital Art (ADA)

→ <u>Liverpool declaration</u>

Humanities

Example 2: eLexicography

EUROPEAN
NETWORK OF
e-LEXICOGRAPHY

existing communities of practice to be connected e.g. COST IS 1305 ENeL

→ DARIAH Working Group proposal

Social Sciences

Example 2: Social Innovation

existing communities of practice
to be connected
e.g. European School on Social Innovation (ESSI)

→ DARIAH Working Group proposal

Challenges for DARIAH and A+H-eResearch-Infrastructures

Current challenges

Framework:

Arts and Humanities @ Cyberscience

- Data | Information
- Diciplines, Scientific Paradigms
- People

Challenges

- Big Data in the Humanities
- Inter-, transdisciplinary Humanities
- Knowledge Societies
- Citizen Science
- Open Access, Open Data, Open Science
- Open Innovation
- Inclusive Innovation: Technological and Social Innovation
- Sustainability

Technical Insight DARIAH-ERIC

Collaboration with European infrastructures

Different Interests in Research Infrastructures

Computing- and Data Centres

Research Institutes / Scholars

applications

Generic applications and services

Infrastructure

Community specific applications and services

Generic applications and services

Infrastructure

Network of affiliated projects (1)

Archaeologists

Holocaust Researchers

Medieval and Modern Historians

Cultural Heritage conservation

Digital Textual Scholarship

Digital Methods

Network of affiliated projects (2)

- Enable discipline-specific infrastructures
 - Integrating activities
 - e.g. ARIADNE, CENDARI, CHARISMA, EHRI
- Research into e-Research, analysis of methods:
 - NeDiMAH (Network for Digital Methods in the Arts and Humanities)
 - TaDiRAH (Taxonomy of Digital Research Activities in the Humanities)

Example affiliated project: Cendari

- CENDARI: "is a research infrastructure project aimed at integrating digital archives for the medieval and World War one eras."
- What does CENDARI get from DARIAH?
 - DARIAH[-DE] technical environment (e.g. collaboration tools, long-term archiving, virtual machines)
 - Expertise in data modeling and standards for (meta-) data interoperability
 - Sustainable infrastructure and sustainability plan for CENDARI results
- How does DARIAH benefit from CENDARI?
 - Close links with historians, their research questions and methods
 - Access to a wide network of European archives
 - Good practices in formats and standards for archival description (EAG, EAC, EAD)

DARIAH e-Infrastructure

- The DARIAH e-Infrastructure needs to support
 - Collaboration
 - Sharing
 - Contributions
- What is the technical background for it?

Collaboration on the Technical infrastructure

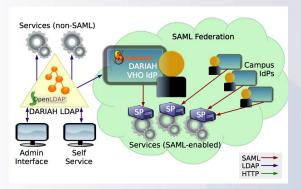

Collaboration on the Technical Infrastructure

- Collaboration with other (European) infrastructures
- The DARIAH e-Infrastructure aims interoperability
- DARIAH utilizes existing standards and existing services
 - Examples

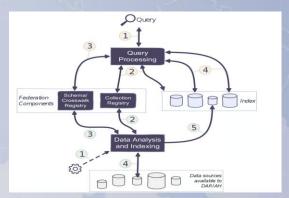

Examples of Collaboration on the Technical Infrastructure

AAI Infrastructure

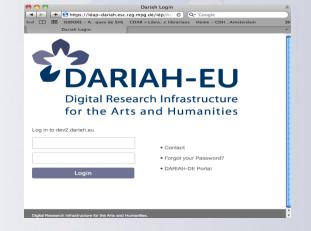

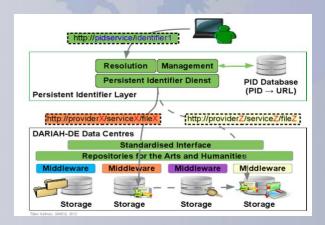

DARIAH-EU

Federated, Generic Search

Collaboration Tools

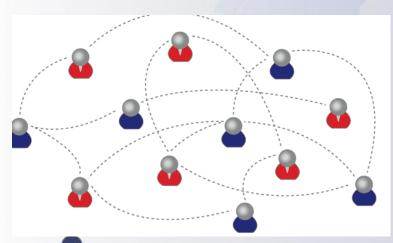

Persistent Identification

DARIAH AAI

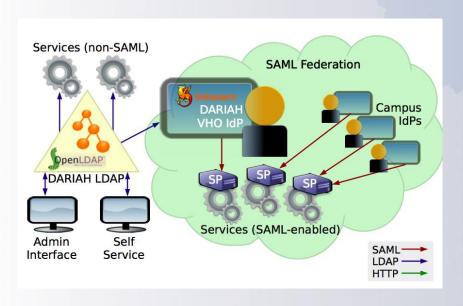

DARIAH is a Network of ...

- a wide variety of research communities across the arts and humanities
- affiliated projects in the wider DARIAH landscape, e.g. EHRI, CENDARI, ARIADNE
- working communities of practice

DARIAH AAI (2)

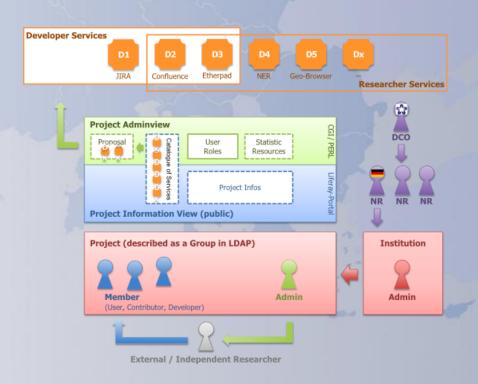

- In Whom We Trust?
- "A connected network of people, information, tools, and methodologies for investigating, exploring and supporting work across the broad spectrum of the digital humanities"
 - Find and use a wide range of research data
 - Work across domains and disciplines
- Group and attribute management integration with DARIAH AAI

DARIAH AAI (3)

- Possible ways for DARIAH:
 - Own federation for the Arts and Humanities
 - Fedearation of federations
 - eduGAIN is a good approach to pan European AAI for DARIAH
 - DARIAH would like to see more and reasonable attributes available
 - Combination of eduGAIN and community specific DARIAH homeless-IdP and attribute authority
 - Support safe attribute release via GÉANT Code of Conduct

ARIAH-EU

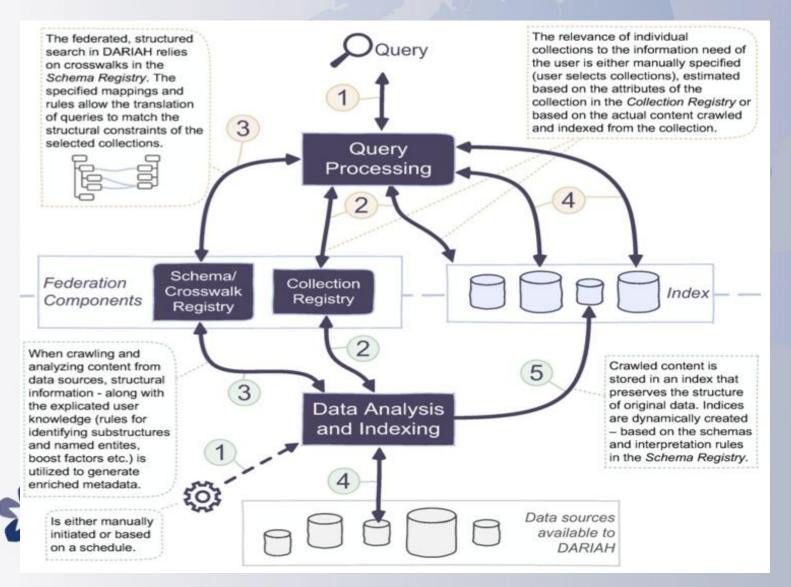

Federated, Generic Search

- Schema/Crosswalk Registry
 - Federated search relies on crosswalks
 - Mappings and rules allow transforming the queries to match the constraints of sources
- Collection Registry
 - Data sources (collections)
- Indeces
 - Store crawled and analyzed content
 - Dynamically created based on crosswalks

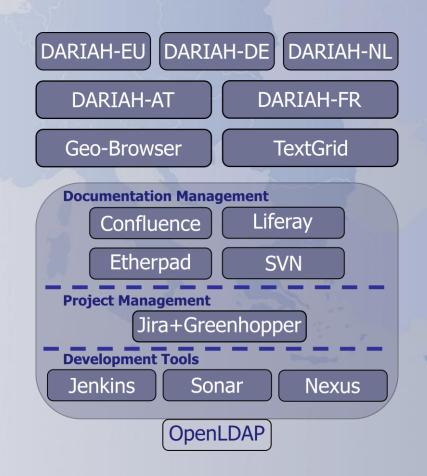

Federated, Generic Search (2)

Collaboration Tools

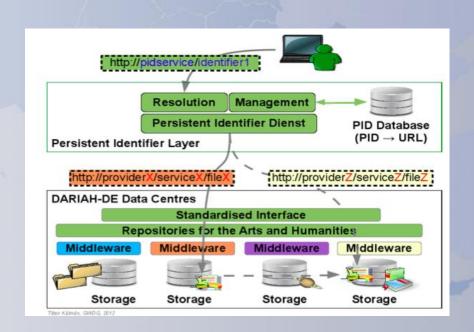

- Technical Infrastructure
- Project Management, Code Hosting, Revision Control, Software Testing, Documentation, Communication, Issue Tracking System with software (e.g. Etherpad, JIRA, Jenkins, Greenhopper among others)

Basic Services – Persistent Identifier

- Persistent identification of digital objects
 - for publishing and referencing
- It requires standards and services
- DARIAH applies existing standards and services
 - Handle (<u>www.pidconsortium.eu</u>), URN, etc
 - Globally distributed resolution
- Service operated by DARIAH partners

Summary

- Productive infrastructure and services are available and widely used.
- DARIAH can serve as a blueprint for other A+H infrastructures and research domains.
- Long-term perspective: Increase number of "commodity" services.
- Network: Lower the barrier for projects and communities to connect / join in!
- Funding: Creating a sustainable ecosystem is costly: sustainable funding structures are needed!
