IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP's aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of information technology for the benefit of all people.

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP's events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- Open conferences;
- Working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is less rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is in information may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly. National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.

Preface

I would like to express my sincere thanks to all authors who submitted research papers to support the 5th International Conference on Computer and Computing Technologies in Agriculture (CCTA 2011) held in Beijing, China, during October 29–31, 2011.

This conference was hosted by China Agricultural University; the IFIP TC5 Special Interest Group (SIG) on Advanced Information Processing for Agriculture (AIPA); National Natural Science Foundation of China; and China-EU Centre for Information and Communication Technologies (CICTA).

Proper scale management is not only a necessary approach in agromodernization and agro-industrialization but also required for the development of agricultural productivity. Therefore, the application of different technologies in agriculture has become especially important. ‘Informatized agriculture’ and the ‘Internet of Things’ are hot research topics in many countries aiming to scientifically manage agriculture to yield high incomes with low costs. CICTA covers the research and development of advanced and practical technologies applied to agriculture and promotes international communication and cooperation; it has successfully held five International Conferences on Computer and Computing Technologies in Agriculture since 2007.

The topics of CCTA 2011 covered a wide range of the interesting theory and applications of all kinds of technology in agriculture, including the Internet of Things; simulation models and decision-support systems for agricultural production; agricultural product quality testing; traceability and e-commerce technology; the application of information and communication technology in agriculture; and universal information service technology and service system development in rural areas.

We selected the 189 best papers among all those submitted to CCTA 2011 for these proceedings. The papers are divided into three themes. It is always exciting to have experts, professionals and scholars with creative contributions getting together and sharing some inspiring ideas and hopefully accomplishing great developments in high-demand technologies.

Finally, I would like also to express my sincere thanks to all authors, speakers, Session Chairs and attendees, from home and abroad, for their active participation and support of this conference.

Table of Contents – Part II

GIS, GPS, RS and Precision Farming

Study on Soil Nutrients Spatial Variability in Yushu City	1
<i>Yueling Zhao, Haiyan Han, Liying Cao, and Guifen Chen</i>	
The Application of Classical Least Square Algorithm in the Quantitative Analysis of Lime in Wheat Flour by ATR-MIR Spectroscopy	8
<i>Dong Wang, Donghai Han, Zhihong Ma, Ligang Pan, Liu Zhao, Ping Han, and Jihua Wang</i>	
Study of Quantitative Analysis for Moisture Content in Winter Wheat Leaves Using MSC-ANN Algorithm	17
<i>Hao Ma, Haiyan Ji, Xue Liang, and Zhenhong Rao</i>	
FT-NIR and Confocal Microscope Raman Spectroscopic Studies of Sesame Oil Adulteration	24
<i>Jun Luo, Tao Liu, and Yande Liu</i>	
Non-Point Source Pollution Characteristics of Agriculture-Derived Nitrogen in Groundwater in Suburban Area of Shanghai Based on Models	32
<i>Guangrong Shen, Xiumei Huang, Pei Zhou, Lumei Wang, and Yuee Zhi</i>	
Nondestructive Estimation of Total Free Amino Acid in Green Tea by Near Infrared Spectroscopy and Artificial Neural Networks	43
<i>Zhiming Guo, Liping Chen, Chunjiang Zhao, Wenqian Huang, and Quansheng Chen</i>	
Daily Reference Evapotranspiration Estimation Based on Least Squares Support Vector Machines	54
<i>Dachun Chen</i>	
Data Analysis of Cold Rice Blast Based on Near Infrared Spectroscopy	64
<i>Feng Tan, Xiaodan Ma, Chun Wang, and Tingyi Shang</i>	
Study on Dynamic Variation Regularities of Regional Groundwater Depth Based on Complexity Diagnosis	72
<i>Dong Liu, Miao Yu, Nan Sun, and Ying Qi</i>	

Comparison of Spectral Indices and Principal Component Analysis for Differentiating Lodged Rice Crop from Normal Ones	84
<i>Zhanyu Liu, Cunjun Li, Yitao Wang, Wenjiang Huang, Xiaodong Ding, Bin Zhou, Hongfeng Wu, Dacheng Wang, and Jingjing Shi</i>	
Sustainable Fertilizer Level for Winter Wheat in Different Rainfall Regions on the Loess Plateau of China	93
<i>Xuechun Wang, Shishun Tao, Mingde Hao, and Wei Li</i>	
Based on Vague Sets of Strawberry Varieties Resistance Comparison ...	107
<i>Yan Zhang, Hongxu Wang, and Hongbin Zhang</i>	
Evaluating New Varieties of Wheat with the Application of Vague Optimization Methods	115
<i>Hongxu Wang, FuJin Zhang, and Yunsheng Xu</i>	
Research on Effect of Ventilated Region to Grape Rain Shed Performance Based on CFD	123
<i>Jian Wang and Hongbing Yang</i>	
Research on Evaluation of Agricultural Planting Security in Hebei Province	129
<i>Li Deng and Yali Li</i>	
Evaluation of Temporal Resolution Effect in Remote Sensing Based Crop Phenology Detection Studies	135
<i>Hu Zhao, Zhengwei Yang, Liping Di, and Zhiyuan Pei</i>	
Agricultural Landscape Dynamics and Its Response in Seasonal Vegetation Activities in the Loess Plateau, Northern Shaanxi, China ...	151
<i>Zhengguo Li, Peng Yang, Yanglin Wang, Qingbo Zhou, Huajun Tang, and Hsiaofoei Chang</i>	
Shape Feature Extraction of Wheat Leaf Disease Based on Invariant Moment Theory	168
<i>Zhihua Diao, Anping Zheng, and Yuanyuan Wu</i>	
Nitrogen Status Estimation of Winter Wheat by Using an IKONOS Satellite Image in the North China Plain	174
<i>Liangliang Jia, Zihui Yu, Fei Li, Martin Gnyp, Wolfgang Koppe, Georg Bareth, Yuxin Miao, Xinping Chen, and Fusuo Zhang</i>	
Assessment of Potential Risk in Soil and Early Warning Analysis in Four Counties, Northeast China	185
<i>Lingling Sang, Chao Zhang, Jianyu Yang, Dehai Zhu, and Wenju Yun</i>	

The Comparative Analysis of Spatial Structure of Ji Wheat 22 Yield Based on Different Stochastic Samplings	195
<i>Yujian Yang and Xueqin Tong</i>	
Research on Throwing Soil Regular Pattern of Reversal Cultivated Land and Fertilization Seeder	206
<i>Yongliang Zhang, Jianping Hu, Chunjian Zhou, and Chuantong Lu</i>	
A Research about the Application of Information Technology in the Precision Agriculture—Taking the Operating System of Shanghai Agriculture Economy as an Example	215
<i>Hong Yao and Yong-xing Wu</i>	
Research on the Data Conversion Specification for Chinese Agricultural Product Quantity Safety	224
<i>Kaimeng Sun</i>	
Small-Scale Evaluation of Tobacco Planting Suitability Based on Spatial Information Technology	234
<i>Fengrui Chen, Guangxiong Peng, Wei Su, Yaochen Qin, and Xi Li</i>	
Study on Spatial Model and Service Radius of Rural Areas and Agriculture Information Level in Yellow-River Delta	248
<i>Yujian Yang, Guangming Liu, Xueqin Tong, and Zhicheng Wang</i>	
The Effect of Intercropping of Maize and Soybean on Microclimate	257
<i>Hanming He, Lei Yang, Liming Fan, Lihua Zhao, Han Wu, Jing Yang, and Chengyun Li</i>	
Estimating Foliar Pigment Concentration of Rice Crop Using Integrated Hyperspectral Index	264
<i>Zhanyu Liu, Wenjiang Huang, Guofu Mao, Cunjun Li, Xingang Xu, Xiaodong Ding, Jingjing Shi, and Bin Zhou</i>	
Identifying Leaf-Scale Wheat Aphids Using the Near-Ground Hyperspectral Pushbroom Imaging Spectrometer	275
<i>Jinling Zhao, Dongyan Zhang, Juhua Luo, Dacheng Wang, and Wenjiang Huang</i>	
Research on Application of Web Log Analysis Method in Agriculture Website Improvement	283
<i>Jian Wang</i>	
Spatial Pattern of Plant Specimen and Its Implications in Conservation Biology in Hengduan Mountains of Southwest China	294
<i>Hanming He and Jianmeng Feng</i>	
Determination of Corn Nutrient Status under N&K Stressed Condition Using Hyperspectral Analysis	302
<i>Haihua Wang, Minzan Li, and Yane Zhang</i>	

Research in Crop Land Suitability Analysis Based on GIS	314
<i>Guobing Pan and Jianping Pan</i>	
Research on WSN Channel Fading Model and Experimental Analysis in Orchard Environment	326
<i>Wei Zhang, Yong He, Fei Liu, Congcong Miao, Shitao Sun, Chengfeng Liu, and Jianfang Jin</i>	
Analysis of Trace Elements in Leaves Using Laser-Induced Breakdown Spectroscopy	334
<i>Xu Zhang, Mingyin Yao, Muhua Liu, and Zejian Lei</i>	
Land Use/Land Cover Classification Based on Multi-resolution Remote Sensing Data	340
<i>Yuechen Liu, Zhiyuan Pei, Quan Wu, Lin Guo, Hu Zhao, and Xiwei Chen</i>	
Study on Quick Identify of the Brand of Seabuckthorn Juice Based on PCA and SVM	351
<i>Zhipeng Liu and Shujuan Zhang</i>	
Research and Application of Space-Time Evolution of Soil Fertility Data Mining Based on Visualization	359
<i>Wei Dong, Guifen Chen, Jian Jiang, and Guowei Wang</i>	
Spatial Information Sharing Technology Based on Grid	368
<i>Hong-bin Zhang, Bao-rui Chen, Gang Li, and Xiao-ping Xin</i>	
A Robust Graph Based Learning Approach to Agricultural Data Classification	375
<i>Baojie Ji, Caili Su, and Wanzhong Lei</i>	
Wheat Grain Protein Content Estimation Based on Multi-temporal Remote Sensing Data and Generalized Regression Neural Network	381
<i>Cunjun Li, Qian Wang, Jihua Wang, Yan Wang, Xiaodong Yang, Xiaoyu Song, and Wenjiang Huang</i>	
Study on the GPS Data De-noising Method Based on Wavelet Analysis	390
<i>Debao Yuan, Ximin Cui, Guo Wang, Jingjing Jin, Dongli Fan, and Xiaogang Jia</i>	
Forest Cover Classification from Multi-temporal MODIS Images in Southeast Asia Using Decision Tree	400
<i>Sijie Wu, Jianxi Huang, Xingquan Liu, and Guannan Ma</i>	

Large-Scale Microwave Remote Sensing of Retrieving Surface Multi-parameters Using Active and Passive Satellite Data: In the Tibetan Plateau Region of Maqu	415
<i>Ruofei Zhong, Jianxi Huang, Jiangxia Wei, Qin Li, Jiao Guo, and Wei Su</i>	
Grading Method of Crop Disease Based on Image Processing	427
<i>Youwen Tian, Lide Wang, and Qiuying Zhou</i>	
Evolution Characteristics for Water Eco-Environment of Baiyangdian Lake with 3S Technologies in the Past 60 Years	434
<i>Yunkai Li, Lingyan Wang, Hua Zheng, Hai Jin, Tingwu Xu, Peiling Yang, Xiaokai Tijiang, Zengcai Yan, Zhiheng Ji, Jianli Lu, Zhanfeng Wang, and Zhiyun Ouyang</i>	
Application and Evaluation of Wavelet-Based Denoising Method in Hyperspectral Imagery Data	461
<i>Hao Yang, Dongyan Zhang, Wenjiang Huang, Zhongling Gao, Xiaodong Yang, Cunjun Li, and Jihua Wang</i>	
Estimation of Maize Planting Area through the Fusion of Multi-source Images	470
<i>Xiaohu Gu, Yuchun Pan, Xin He, and Jihua Wang</i>	
Discriminant Analysis of Red Wines from Different Aging Ways by Information Fusion of NIR and MIR Spectra	478
<i>Sijia Tao, Jingming Li, Junhui Li, Jianbo Tang, Jinrui Mi, and Longlian Zhao</i>	
Study on Automatic Composition of Semantic Geospatial Web Service	484
<i>Dacheng Wang, Hongfeng Wu, Xiaodong Yang, Wei Guo, and Weihong Cui</i>	
The Estimation of Winter Wheat Yield Based on MODIS Remote Sensing Data	496
<i>Linsheng Huang, Qinying Yang, Dong Liang, Yansheng Dong, Xingang Xu, and Wenjiang Huang</i>	
Prediction of Wheat Stripe Rust Based on Neural Networks	504
<i>Haiguang Wang and Zhanhong Ma</i>	
Research on Surface Sampling for Determination of Pesticide Residues in Pome Fruit	516
<i>Yunxia Luan, Hua Ping, Zhihong Ma, and Ligang Pan</i>	
Hyperspectral Discrimination and Response Characteristics of Stressed Rice Leaves Caused by Rice Leaf Folder	528
<i>Zhanyu Liu, Jia-an Cheng, Wenjiang Huang, Cunjun Li, Xingang Xu, Xiaodong Ding, Jingjing Shi, and Bin Zhou</i>	

Image Segmentation of Pseudo-foreign Fibers in Cotton on the Basis of Improved Genetic Algorithm	538
<i>Lulu Ge, Daoliang Li, Liu Yang, and Wenzhu Yang</i>	
Research and Design of an Agricultural Scientific Instruments Classification and Code Management System	549
<i>Wenshen Jia, Ligang Pan, Jihua Wang, Wenfu Wu, Yang Li, and Yuange Qian</i>	
The Self-adaptive Adjustment Method of Clustering Center in Multi-spectral Remote Sensing Image Classification of Land Use	559
<i>Shujing Wan, Chengming Zhang, Jiping Liu, Yong Wang, Hui Tian, Yong Liang, and Jing Chen</i>	
A Review of Measurement Methods of Dissolved Oxygen in Water	569
<i>Haijiang Tai, Yuting Yang, Shuangyin Liu, and Daoliang Li</i>	
Study on the Walnut Mechanical Characteristics and Shucking Technology Based on Finite Element Analysis	577
<i>Hongmei Xu, Shuiping Yan, Yi Wang, and Meiyang Liu</i>	
Experimental Study on Forced-Air Precooling of Dutch Cucumbers.....	587
<i>Jingying Tan, Shi Li, and Qing Wang</i>	
Experimental Study on the Effects of Mechanical and Physical Characteristics on Walnut Shucking	594
<i>Hongmei Xu, Shuiping Yan, and Yapeng Bai</i>	
Research on the Effects of Mechanical and Physical Characteristics on Peanut Shucking	603
<i>Hongmei Xu, Shuiping Yan, and Qi Huang</i>	
Preliminary Study on Soil Moisture Forecast of Winter Wheat.....	612
<i>Xiumei Zhang, Yuchun Pan, Bingbo Gao, Chunshan Su, and Jihua Wang</i>	
Qualitative Analysis of Age and Brand of Unblended Brandy by Electronic Nose	619
<i>Yang Yang, Yu Zhao, Shuming Zhang, Yuanying Ni, and Jicheng Zhan</i>	
The Measurement of the Agricultural Informatization Contribution Rate Based on the Analysis of the Composite Index and the C-D Production Function	629
<i>Liyong Liu and Daoliang Li</i>	

Estimation of Soil Total Nitrogen and Soil Moisture Based on NIRS Technology	639
<i>Xiaofei An, Minzan Li, and Lihua Zheng</i>	
The Improved DBSCAN Algorithm Study on Maize Purity Identification	648
<i>Pan Wang, Shuangxi Liu, Mingming Liu, Qinxiang Wang, Jinxing Wang, and Chunqing Zhang</i>	
Author Index	657
