IFIP Advances in Information and Communication Technology

Editor-in-Chief

A. Joe Turner, Seneca, SC, USA

Editorial Board

Foundations of Computer Science
Jacques Sakarovitch, Télécom ParisTech, France

Software: Theory and Practice
Michael Goedicke, University of Duisburg-Essen, Germany

Education
Arthur Tatnall, Victoria University, Melbourne, Australia

Information Technology Applications
Erich J. Neuhold, University of Vienna, Austria

Communication Systems
Aiko Pras, University of Twente, Enschede, The Netherlands

System Modeling and Optimization
Fredi Tröltzsch, TU Berlin, Germany

Information Systems
Jan Pries-Heje, Roskilde University, Denmark

ICT and Society
Diane Whitehouse, The Castlegate Consultancy, Malton, UK

Computer Systems Technology
Ricardo Reis, Federal University of Rio Grande do Sul, Porto Alegre, Brazil

Security and Privacy Protection in Information Processing Systems
Yuko Murayama, Iwate Prefectural University, Japan

Artificial Intelligence
Tharam Dillon, Curtin University, Bentley, Australia

Human-Computer Interaction
Jan Gulliksen, KTH Royal Institute of Technology, Stockholm, Sweden

Entertainment Computing
Matthias Rauterberg, Eindhoven University of Technology, The Netherlands
IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP’s aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

IFIP’s mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of information technology for the benefit of all people.

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP’s events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- Open conferences;
- Working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is about information processing may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly, National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.
Preface

This book developed from the collaborative effort of the IFIP Working Group 8.6, a working group dedicated to the study of diffusion and adoption of information technology innovations. The book contains the proceedings of the IFIP Working Conference on Creating Values for All Through IT held in Aalborg, Denmark, in June of 2014.

The theme of the conference was “Creating values for all through IT” and was intended to encourage researchers to reflect on future technologies that create value by transferring and diffusing new functionality, features, and capability, in new forms, and to larger groups of users and customers. New phenomena that have the potential to extend our perspective on value creation include: platforms for third-party development, Internet of things, green IS, smart cities, social media, and cloud computing. Contexts in which IT is used become increasingly complex, uncertain, and differentiated. These are just a few examples. The conference provided a forum for consideration and evaluation of new and radical innovations and allowed researchers to consider values and value creation in the context of advanced utilization of future and enabling information technologies.

The conference employed a public call for papers and attracted a total of 37 submissions. These included 28 full research papers, and eight other papers, research-in-progress papers, experience reports, and panels. The conference Program Committee refereed the submissions in a blinded review process. Ultimately, we selected 18 research papers, five research-in-progress papers, two experience reports, and one panel.

The Program Committee was active in shaping and promoting the conference and they played a key role as reviewers and selectors of the contributions to the conference and to this book.

A conference and the production of a book is never possible without the commitment and hard work of the Program Committee and many others. In addition to the Program Committee we want to thank IFIP and the sponsors and in particular the organizers who were responsible for the implementation of the program and for setting up a facilitating environment during the conference.

March 2014

Birgitta Bergvall-Kåreborn
Peter Axel Nielsen
Organization

General Chair

Tor J. Larsen  Norwegian Business School

Program Co-chairs

Birgitta Bergvall-Kåreborn  Luleå University of Technology, Sweden
Peter Axel Nielsen  Aalborg University, Denmark

Conference Organization

John Stouby Persson  Aalborg University, Denmark
Ivan Aaen  Aalborg University, Denmark
Merete Wolder Lange  Aalborg University, Denmark

Program Committee

Deborah Bunker  Sydney Business School, Australia
Frada Burstein  Monash University, Australia
Kieran Conboy  National University Ireland Galway, Ireland
Linda Dawson  University of Wollongong, Australia
Yogesh Dwivedi  Swansea University, UK
Andreas Gadatsch  Hochschule Bonn-Rhein-Sieg, Germany
Robert Galliers  Bentley College, USA
Helle Zinner Henriksen  Copenhagen Business School, Denmark
Netta Iivari  Oulu University, Finland
Karl Kautz  University of Wollongong, Australia
Pernille Kåremergaard  Aalborg University, Denmark
Lars Mathiassen  Georgia State University, USA
Jacob Nørbjerg  Aalborg University, Denmark
Markus Nüttgens  Hamburg University, Germany
John Persson  Aalborg University, Denmark
Jan Pries-Heje  Roskilde University, Denmark
Tero Päivärinta  Luleå University of Technology, Sweden

Table of Contents

Creating Value

Value Creation from Public Healthcare IS – An Action Research Study in the Faroe Islands .................................................. 1
  Bjarne Rerup Schlüchter, Per Svejvig, and Povl Erik Rostgaard Andersen

The Challenges of Creativity in Software Organizations ................. 16
  Frank Ulrich and Shegaw Anagaw Mengiste

Diffusing Best Practices: A Design Science Study Using the Theory of Planned Behavior ..................................................... 35
  Richard Baskerville and Jan Pries-Heje

Digital Innovation and Social Dilemmas ..................................... 49
  Maria Åkesson and Michel Thomsen

Generating Sustainable Value from Open Data in a Sharing Society .... 62
  Thorhildur Jetzek, Michel Avital, and Niels Bjørn-Andersen

The Interaction Effect of Complimentary Assets on Relationship between Information and Communication Technology and Public Health Outcomes ......................................................... 83
  Supunmali Ahangama and Danny Chiang Choon Poo

Creating Value through Software Development

We All Know How, Don’t We? On the Role of Scrum in IT-Offshoring .......................................................... 96
  Christian Koch, Claus Jørgensen, Martin Olsen, and Torben Tambo

Designing Project Management for Global Software Development:
Informality through Formality .................................................. 113
  Gitte Tjørnehøj, Maria B. Balogh, Cathrine Iversen, and Stine Sørensen

Pragmatic Software Innovation .................................................. 133
  Ivan Aaen and Rikke Hagensby Jensen

Creating Business Value through Agile Project Management and Information Systems Development: The Perceived Impact of Scrum ....... 150
  Karlheinz Kautz, Thomas Heide Johansen, and Andreas Uldahl
## Table of Contents

### Creating Value through Applications

**A Creative and Useful Tension? Large Companies Using “Bring Your Own Device”**

*Don Kerr and Christian Koch*

- 166

**What Drives Fitness Apps Usage? An Empirical Evaluation**

*Duwaraka Yoganathan and Sangaralingam Kajanan*

- 179

**Motivation and Knowledge Sharing through Social Media within Danish Organizations**

*Pia Nielsen and Liana Razmerita*

- 197

**A Literature Review on Cloud Computing Adoption Issues in Enterprises**

*Rania Fahim El-Gazzar*

- 214

**Here Today, Here Tomorrow: Considering Options Theory in Digital Platform Development**

*Ted Saarikko*

- 243

**Rethinking the Roles of Actors in the Mobility of Healthcare Services**

*Tiko Iyamu, Suama Hamunyela, and Sharol Sibongile Mkhamazi*

- 261

**A Mechanism-Based Explanation of the Institutionalization of Semantic Technologies in the Financial Industry**

*Tom Butler and Elie Abi-Lahoud*

- 277

### Panel

**Diffusion and Innovation Theory: Past, Present, and Future Contributions to Academia and Practice**

*Richard Baskerville, Deborah Bunker, Johan Olaisen, Jan Pries-Heje, Tor. J. Larsen, and E. Burton Swanson*

- 295

### Research in Progress

**Entrepreneurial Value Creation in the Cloud: Exploring the Value Dimensions of the Business Model**

*Jyoti M. Bhat and Bhavya P. Shroff*

- 301

**mGovernment Services and Adoption: Current Research and Future Direction**

*Mehdi Hussain and Ahmed Imran*

- 311

**Human Interaction in the Regulatory of Telecommunications Infrastructure Deployment in South Africa**

*Sharol Sibongile Mkhamazi and Tiko Iyamu*

- 324
A Theoretical Framework for Examining IT Governance in Living Laboratory Ecosystems ........................................... 334
   *Trevor Clohessy, Lorraine Morgan, and Thomas Acton*

Examining Contextual Factors and Individual Value Dimensions of Healthcare Providers Intention to Adopt Electronic Health Technologies in Developing Countries ........................................ 345
   *Yvonne O’Connor, Stephen Treacy, and John O’Donoghue*

**Experience Report**

Personalized Support with ‘Little’ Data ........................................ 355
   *Peter Bednar, Peter Imrie, and Christine Welch*

The “PantryApp”: Design Experiences from a User-Focused Innovation Project about Mobile Services for Senior Citizens ........................ 359
   *Anna Sigridur Island*

**Author Index** ................................................................. 363
