IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP's aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of information technology for the benefit of all people.

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP's events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- Open conferences;
- Working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is less rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is in information may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly, National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.

Preface

Identifying Emerging Trends in Technological Innovation

Doctoral programs in science and engineering are important sources of innovative ideas and techniques that might lead to new products and technological innovation. Certainly most PhD students are not experienced researchers and are in the process of learning how to do research. Nevertheless, a number of empiric studies also show that a high number of technological innovation ideas are produced in the early careers of researchers. The combination of the eagerness to try new approaches and directions of young doctoral students with the experience and broad knowledge of their supervisors is likely to result in an important pool of innovation potential.

The DoCEIS doctoral conference on Computing, Electrical and Industrial Engineering aims at creating a space for sharing and discussing ideas and results from doctoral research in these inter-related areas of engineering. Innovative ideas and hypotheses can be better enhanced when presented and discussed in an encouraging and open environment. DoCEIS aims to provide such an environment, releasing PhD students from the pressure of presenting their propositions in more formal contexts.

The first edition of DoCEIS, which was sponsored by Socolnet, IFIP and IEEE Industrial Electronics Society, attracted a considerable number of paper submissions from a large number of PhD students (and their supervisors) from 15 countries. This book comprises the works selected by the International Program Committee for inclusion in the main program and covers a wide spectrum of topics, ranging from collaborative enterprise networks to microelectronics. Thus, novel results and ongoing research in the following areas were presented, illustrated, and discussed:

- Value systems alignment in enterprise networks
- Collaborative networks governance and support
- Information modelling and management
- Risk assessment and decision support based on imprecise information
- Evolvable manufacturing systems and cooperative robotics
- Systems modelling and control
- Advances in telecommunications and electronics
- Sensorial perception and signal processing
- Energy systems and novel electrical machinery

As a gluing element, all authors were asked to explicitly indicate the (potential) contribution of their work to technological innovation.

We expect that this book will provide readers with an inspiring set of promising ideas, presented in a multi-disciplinary context, and that by their diversity these results can trigger and motivate new research and development directions.

We would like to thank all the authors for their contributions. We also appreciate the dedication of the DoCEIS Program Committee members who both helped with the selection of articles and contributed with valuable comments to improve their quality.

In collaboration with PhD Programs in: Electrical and Computer Engineering - FCT-U Coimbra and Electronics and Telecommunications - U Algarve.

Table of Contents

Part 1: Enterprise Networks and Strategic Alignment

Applying Causal Reasoning to Analyze Value Systems	3
<i>Patricia Macedo and Luis M. Camarinha-Matos</i>	
Assessment of the Willingness to Collaborate in Enterprise Networks	14
<i>João Rosas and Luis M. Camarinha-Matos</i>	
Business and IS/IT Strategic Alignment Framework	24
<i>Llanos Cuenca, Angel Ortiz, and Andres Boza</i>	

Part 2: Issues in Information Systems

Introduction of Empirical Topology in Construction of Relationship Networks of Informative Objects	35
<i>Hesam T. Dashti, Mary E. Kloc, Tiago Simas, Rita A. Ribeiro, and Amir H. Assadi</i>	
The TSTS Method in Cultural Heritage Search	44
<i>Miroslaw Stawniak and Wojciech Cellary</i>	
Representing User Privileges in Object-Oriented Virtual Reality Systems	52
<i>Adam Wójtowicz and Wojciech Cellary</i>	
Survey of Media Forms and Information Flow Models in Microsystems Companies	62
<i>Christopher Durugbo, Ashutosh Tiwari, and Jeffery R. Alcock</i>	

Part 3: Collaborative Networks Support

The Virtual Enterprise from a Governance Perspective	73
<i>David Romero, Ana Inês Oliveira, Luis M. Camarinha-Matos, and Arturo Molina</i>	
Negotiation and Contracting in Collaborative Networks	83
<i>Ana Inês Oliveira and Luis M. Camarinha-Matos</i>	
Pro-Active Asset Entities in Collaborative Networks	93
<i>Tiago Cardoso and Luis M. Camarinha-Matos</i>	

Part 4: Assessment and Decision Support

Qualitative Model for Risk Assessment in Construction Industry: A Fuzzy Logic Approach	105
<i>Abel Pinto, Isabel L. Nunes, and Rita A. Ribeiro</i>	
Decision Support for Life-Cycle Optimization Using Risk Assessment ...	112
<i>Maria Marques and Rui Neves-Silva</i>	
A Clinical Decision Support System for Breast Cancer Patients	122
<i>Ana S. Fernandes, Pedro Alves, Ian H. Jarman, Terence A. Etchells, José M. Fonseca, and Paulo J.G. Lisboa</i>	

Part 5: Evolvable Factory Automation

Evolvable Production Systems: Mechatronic Production Equipment with Evolutionary Control	133
<i>Antonio Maffei, Mauro Onori, Pedro Neves, and José Barata</i>	
The Meaningfulness of Consensus and Context in Diagnosing Evolvable Production Systems	143
<i>Luis Ribeiro, José Barata, and João Ferreira</i>	
Applications of Dynamic Deployment of Services in Industrial Automation	151
<i>Gonçalo Candido, José Barata, François Jammes, and Armando W. Colombo</i>	
Improving Energy Efficiency in the Production Floor Using SoA-Based Monitoring Techniques	159
<i>Daniel Cachapa, Robert Harrison, and Armando W. Colombo</i>	

Part 6: Cooperative Robotics

Dual-Arm Robot Motion Planning Based on Cooperative Coevolution	169
<i>Petar Ćurković and Bojan Jerbić</i>	
Comparative Study of Self-organizing Robotic Systems Regarding Basic Architecture	179
<i>Irina-Gabriela Lulu and Aurelian Mihai Stanescu</i>	
Laban Movement Analysis towards Behavior Patterns	187
<i>Luís Santos and Jorge Dias</i>	
Self-adaptive Vision System	195
<i>Tomislav Stipancic and Bojan Jerbić</i>	

Part 7: Robots and Manipulation

Right-Arm Robotic-Aided-Therapy with the Light-Exoskeleton: A General Overview	205
<i>Luis I. Lugo-Villeda, Antonio Frisoli, Edoardo Sotgiu, Giovanni Greco, and Massimo Bergamasco</i>	
Grasp Exploration for 3D Object Shape Representation Using Probabilistic Map	215
<i>Diego R. Faria, Ricardo Martins, and Jorge Dias</i>	
Movement Speed Models of Natural Grasp and Release Used for an Industrial Robot Equipped with a Gripper	223
<i>Mihai Stoica, Gabriela Andreea Calangiu, and Francisc Sisak</i>	

Part 8: Petri Nets Based Modeling

Petri Net Based Engineering and Software Methodology for Service-Oriented Industrial Automation	233
<i>J. Marco Mendes, Francisco Restivo, Paulo Leitão, and Armando W. Colombo</i>	
Properties Preservation in Distributed Execution of Petri Nets Models	241
<i>Anikó Costa, Paulo Barbosa, Luís Gomes, Franklin Ramalho, Jorge Figueiredo, and Antônio Junior</i>	
Semantic Equations for Formal Models in the Model-Driven Architecture	251
<i>Paulo Barbosa, Franklin Ramalho, Jorge Figueiredo, Anikó Costa, Luís Gomes, and Antônio Junior</i>	

Part 9: Advances in Telecommunications

Delay Analysis for TDMA Schemes with Packet Recombining	263
<i>Miguel Pereira, Luís Bernardo, Rui Dinis, Rodolfo Oliveira, Paulo Carvalho, and Paulo Pinto</i>	
Optoelectronic Oscillators for Communication Systems	273
<i>Bruno Romeira and José Figueiredo</i>	
Simulation Model for OBS Contention Avoidance Routing Strategies ...	281
<i>Alvaro L. Barradas and Maria do Carmo R. Medeiros</i>	
Transmission Performance of mm-Waves on Radio over Fiber Systems: Dispersion and Intermodulation Issues	289
<i>Ricardo Avó, Paula Laurêncio, and Maria C.R. Madeiros</i>	

Part 10: Sensorial Perception – I

Advances in Image Processing Techniques for Drusens Detection and Quantification in Fundus Images	299
<i>André Mora, Pedro Vieira, and José M. Fonseca</i>	
A Novel Framework for Data Registration and Data Fusion in Presence of Multi-modal Sensors	308
<i>Hadi Aliakbarpour, Joao Filipe Ferreira, Kamrad Khoshhal, and Jorge Dias</i>	
Vector Sensor Arrays in Underwater Acoustic Applications	316
<i>Paulo Santos, Paulo Felisberto, and Sérgio M. Jesus</i>	
An Approach to Modification of Water Flow Algorithm for Segmentation and Text Parameters Extraction	324
<i>Darko Brodić and Zoran Milivojević</i>	

Part 11: Sensorial Perception – II

A Face Attention Technique for a Robot Able to Interpret Facial Expressions	335
<i>Carlos Simplício, José Prado, and Jorge Dias</i>	
Using Eye Blinking for EOG-Based Robot Control	343
<i>Mihai Duguleana and Gheorghe Mogan</i>	
Bio-inspired Binocular Disparity with Position-Shift Receptive Field	351
<i>Fernanda da C. e C. Faria, Jorge Batista, and Helder Araújo</i>	

Part 12: Signal Processing – I

Fractional Filters: An Optimization Approach	361
<i>Carlos Matos and Manuel Duarte Ortigueira</i>	
MicroECG: An Integrated Platform for the Cardiac Arrhythmia Detection and Characterization	367
<i>Bruno Nascimento, Arnaldo Batista, Luis Brandão Alves, Manuel Ortigueira, and Raul Rato</i>	
A Contribution for the Automatic Sleep Classification Based on the Itakura-Saito Spectral Distance	374
<i>Eduardo Cardoso, Arnaldo Batista, Rui Rodrigues, Manuel Ortigueira, Cristina Bárbara, Cristina Martinho, and Raul Rato</i>	

Part 13: Signal Processing – II

Controlled Invariant Polyhedral Sets for Constrained Discrete-Time Descriptor Systems	385
<i>José Mario Araújo and Carlos Eduardo Trabuco Dórea</i>	
Using Human Dynamics to Improve Operator Performance	393
<i>Rui Antunes, Fernando V. Coito, and Hermínio Duarte-Ramos</i>	
Railscan: A Tool for the Detection and Quantification of Rail Corrugation	401
<i>Rui Gomes, Arnaldo Batista, Manuel Ortigueira, Raul Rato, and Marco Baldeiras</i>	
Active System for Electromagnetic Perturbation Monitoring in Vehicles	409
<i>Adrian Marian Matoi and Elena Helerea</i>	

Part 14: Advances in Energy Systems

Energy Consumption Monitoring System for Large Complexes	419
<i>André Jorge, João Guerreiro, Pedro Pereira, João Martins, and Luís Gomes</i>	
High Temperature Superconducting Fault Current Limiters as Enabling Technology in Electrical Grids with Increased Distributed Generation Penetration	427
<i>João Murta Pina, Mário Ventim Neves, Alfredo Álvarez, and Amadeu Leão Rodrigues</i>	
On the Mineral and Vegetal Oils Used as Electroinsulation in Transformers	435
<i>Mariana Serban, Livia Sângelorzan, and Elena Helerea</i>	
Interconnections between Reliability, Maintenance and Availability	443
<i>Catalin Mihai, Sorin Abagiu, Larisa Zoitanu, and Elena Helerea</i>	

Part 15: Dedicated Energy Systems

Evaluation of Supercapacitors Effects on Hybrid Energy Systems for Automotive	453
<i>Carmen Lungoci and Elena Helerea</i>	
Characteristics of the PTC Heater Used in Automotive HVAC Systems	461
<i>Radu Musat and Elena Helerea</i>	
Fuel Cell Systems for Telecommunications	469
<i>Eunice Ribeiro, António Cardoso, and Chiara Boccaletti</i>	

Hybrid Photovoltaic-Thermal Collectors: A Review.....	477
<i>Figueiredo Ramos, António Cardoso, and Adérito Alcaso</i>	

Part 16: Advances in Electrical Machinery

Study of AC Losses in Superconducting Electrical Components for Electrical System Design	487
<i>José-María Ceballos, Alfredo Álvarez, and Pilar Suarez</i>	
Robust Position Control of a DC Motor by Sliding Mode.....	495
<i>Gabriela Mamani, Jonathan Becedas, and Vicente Feliu Batlle</i>	
Disc Motor: Conventional and Superconductor Simulated Results Analysis	505
<i>David Inácio, João Martins, Mário Ventim Neves, Alfredo Álvarez, and Amadeu Leão Rodrigues</i>	

Part 17: Electronic Circuits Layout and Optimization

GADISI – Genetic Algorithms Applied to the Automatic Design of Integrated Spiral Inductors	515
<i>Pedro Pereira, M. Helena Fino, Fernando Coito, and Mário Ventim-Neves</i>	
Test Based on Built-In Current Sensors for Mixed-Signal Circuits	523
<i>Román Mozuelos, Yolanda Lechuga, Mar Martínez, and Salvador Bracho</i>	
Structural DfT Strategy for High-Speed ADCs.....	531
<i>Yolanda Lechuga, Román Mozuelos, Mar Martínez, and Salvador Bracho</i>	

Part 18: Microelectronic Circuits Design

A CMOS Inverter-Based Self-biased Fully Differential Amplifier	541
<i>José Rui Custódio, Michael Figueiredo, Edinei Santin, and João Goes</i>	
Reconfigurable Circuits Using Magnetic Tunneling Junction Memories	549
<i>Victor Silva, Jorge Fernandes, and Horácio Neto</i>	
A New Automated Trigger Circuit for a Pulsed Nd: YAG Laser	559
<i>Fatah Almabouada, Djelloul Louhibi, Abderrahmane Haddouche, Abdelkader Noukaz, and Ramdan Beggar</i>	
Author Index	567
