## **IFIP – The International Federation for Information Processing**

IFIP was founded in 1960 under the auspices of UNESCO, following the First World Computer Congress held in Paris the previous year. An umbrella organization for societies working in information processing, IFIP's aim is two-fold: to support information processing within its member countries and to encourage technology transfer to developing nations. As its mission statement clearly states,

*IFIP's mission is to be the leading, truly international, apolitical organization which encourages and assists in the development, exploitation and application of information technology for the benefit of all people.*

IFIP is a non-profitmaking organization, run almost solely by 2500 volunteers. It operates through a number of technical committees, which organize events and publications. IFIP's events range from an international congress to local seminars, but the most important are:

- The IFIP World Computer Congress, held every second year;
- Open conferences;
- Working conferences.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is small and by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is less rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

Any national society whose primary activity is in information may apply to become a full member of IFIP, although full membership is restricted to one society per country. Full members are entitled to vote at the annual General Assembly, National societies preferring a less committed involvement may apply for associate or corresponding membership. Associate members enjoy the same benefits as full members, but without voting rights. Corresponding members are not represented in IFIP bodies. Affiliated membership is open to non-national societies, and individual and honorary membership schemes are also offered.

# Preface

Artificial intelligence (AI) is a rapidly evolving area that offers sophisticated and advanced approaches capable of tackling complicated and challenging problems. Transferring human knowledge into analytical models and learning from data is a task that can be accomplished by soft computing methodologies. Artificial neural networks (ANN) and support vector machines are two cases of such modeling techniques that stand behind the idea of learning. The 2011 co-organization of the 12th Engineering Applications of Neural Networks (EANN) and of the 7th Artificial Intelligence Applications and Innovations (AIAI) conferences was a major technical event in the fields of soft computing and AI, respectively.

The first EANN was organized in Otaniemi, Finland, in 1995. It has had a continuous presence as a major European scientific event. Since 2009 it has been guided by a Steering Committee that belongs to the “EANN Special Interest Group” of the International Neural Network Society (INNS).

The 12th EANN 2011 was supported by the INNS and by the IEEE branch of Greece. Moreover, the 7th AIAI 2011 was supported and sponsored by the International Federation for Information Processing (IFIP).

The first AIAI was held in Toulouse, France, in 2004 and since then it has been held annually offering scientists the chance to present the achievements of AI applications in various fields. It is the official conference of the Working Group 12.5 “Artificial Intelligence Applications” of the IFIP Technical Committee 12, which is active in the field of AI. IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year.

It was the first time ever that these two well-established events were hosted under the same umbrella, on the beautiful Greek island of Corfu in the Ionian Sea and more specifically in the Department of Informatics of the Ionian University.

This volume contains the papers that were accepted to be presented orally at the 7th AIAI conference and the papers accepted for the First International Workshop on Computational Intelligence in Software Engineering (CISE) and the Artificial Intelligence Applications in Biomedicine (AIAB) workshops. The conference was held during September 15–18, 2011. The diverse nature of papers presented demonstrates the vitality of neural computing and related soft computing approaches and it also proves the very wide range of AI applications. On the other hand, this volume contains basic research papers, presenting variations and extensions of several approaches.

The response to the call for papers was more than satisfactory with 150 papers initially submitted. All papers passed through a peer-review process by at least two independent academic referees. Where needed a third referee was consulted to resolve any conflicts. In the EANN/AIAI 2011 event, 34% of the submitted manuscripts (totally 52) were accepted as full papers, whereas 21% were ac-

cepted as short ones and 45% (totally 67) of the submissions were rejected. The authors of accepted papers came from 27 countries all over Europe (e.g., Austria, Bulgaria, Cyprus, Czech Republic, Finland, France, Germany, Greece, Italy, Poland, Portugal, Slovakia, Slovenia, Spain, UK), America (e.g., Brazil, Canada, Chile, USA), Asia (e.g., China, India, Iran, Japan, Taiwan), Africa (e.g., Egypt, Tunisia) and Oceania (New Zealand). Three keynote speakers were invited and they gave lectures on timely aspects of AI and ANN.

1. Nikola Kasabov. Founding Director and Chief Scientist of the Knowledge Engineering and Discovery Research Institute (KEDRI), Auckland ([www.kedri.info/](http://www.kedri.info/)). He holds a Chair of Knowledge Engineering at the School of Computing and Mathematical Sciences at Auckland University of Technology. He is a Fellow of the Royal Society of New Zealand, Fellow of the New Zealand Computer Society and a Senior Member of IEEE. He was Past President of the International Neural Network Society (INNS) and a Past President of the Asia Pacific Neural Network Assembly (APNNA). Title of the keynote presentation: “Evolving, Probabilistic Spiking Neural Network Reservoirs for Spatio- and Spectro-Temporal Data.”
2. Tom Heskes. Professor of Artificial Intelligence and head of the Machine Learning Group at the Institute for Computing and Information Sciences, Radboud University Nijmegen, The Netherlands. He is Principal Investigator at the Donders Centre for Neuroscience and Director of the Institute for Computing and Information Sciences. Title of the keynote presentation: “Reading the Brain with Bayesian Machine Learning.”
3. A.G. Cohn. Professor of Automated Reasoning, Director of Institute for Artificial Intelligence and Biological Systems, School of Computing, University of Leeds, UK. Tony Cohn holds a Personal Chair at the University of Leeds, where he is Professor of Automated Reasoning. He is presently Director of the Institute for Artificial Intelligence and Biological Systems. He leads a research group working on knowledge representation and reasoning with a particular focus on qualitative spatial/spatio-temporal reasoning, the best known being the well-cited region connection calculus (RCC). Title of the keynote presentation: “Learning about Activities and Objects from Video.”

The EANN/AIAI conference consisted of the following main thematic sessions:

- AI in Finance, Management and Quality Assurance
- Computer Vision and Robotics
- Classification-Pattern Recognition
- Environmental and Earth Applications of AI
- Ethics of AI
- Evolutionary Algorithms—Optimization
- Feature Extraction-Minimization
- Fuzzy Systems
- Learning—Recurrent and RBF ANN
- Machine Learning and Fuzzy Control
- Medical Applications

- Multi-Layer ANN
- Novel Algorithms and Optimization
- Pattern Recognition-Constraints
- Support Vector Machines
- Web-Text Mining and Semantics

We would very much like to thank Hassan Kazemian (London Metropolitan University) and Pekka Kumpulainen (Tampere University of Technology, Finland) for their kind effort to organize successfully the Applications of Soft Computing to Telecommunications Workshop (ASCOTE).

Moreover, we would like to thank Efstratios F. Georgopoulos (TEI of Kalamata, Greece), Spiridon Likothanassis, Athanasios Tsakalidis and Seferina Mavroudi (University of Patras, Greece) as well as Grigorios Beligiannis (University of Western Greece) and Adam Adamopoulos (Democritus University of Thrace, Greece) for their contribution to the organization of the Computational Intelligence Applications in Bioinformatics (CIAB) Workshop.

We are grateful to Andreas Andreou (Cyprus University of Technology) and Harris Papadopoulos (Frederick University of Cyprus) for the organization of the Computational Intelligence in Software Engineering Workshop (CISE).

The Artificial Intelligence Applications in Biomedicine (AIAB) Workshop was organized successfully in the framework of the 12th EANN 2011 conference and we wish to thank Harris Papadopoulos, Efthymoulos Kyriacou (Frederick University of Cyprus) Ilias Maglogiannis (University of Central Greece) and George Anastassopoulos (Democritus University of Thrace, Greece).

Finally, the Second Workshop on Informatics and Intelligent Systems Applications for Quality of Life information Services (2nd ISQLIS) was held successfully and we would like to thank Kostas Karatzas (Aristotle University of Thessaloniki, Greece) Lazaros Iliadis (Democritus University of Thrace, Greece) and Mihaela Oprea (University Petroleum-Gas of Ploiesti, Romania).

The accepted papers of all five workshops (after passing through a peer-review process by independent academic referees) were published in the Springer proceedings. They include timely applications and theoretical research on specific subjects. We hope that all of them will be well established in the future and that they will be repeated every year in the framework of these conferences.

We hope that these proceedings will be of major interest for scientists and researchers world wide and that they will stimulate further research in the domain of artificial neural networks and AI in general.

Adam Adamopoulos	University of Thrace, Greece
Athanasios Tsakalidis	University of Patras, Greece
Efthylvoulos Kyriacou	Frederick University, Cyprus
Elias Maglogiannis	University of Central Greece, Greece
George Anastassopoulos	Democritus University of Thrace, Greece

### Honorary Chairs

Tharam Dillon	Curtin University, Australia
Max Bramer	University of Portsmouth, UK

### Sponsoring Institutions

The 12th EANN / 7th AIAI Joint Conferences were organized by IFIP (International Federation for Information Processing), INNS (International Neural Network Society), the Aristotle University of Thessaloniki, the Democritus University of Thrace and the Ionian University of Corfu.

# Table of Contents – Part II

## Computer Vision and Robotics

Real Time Robot Policy Adaptation Based on Intelligent Algorithms . . .	1
<i>Genci Capi, Hideki Toda, and Shin-Ichiro Kaneko</i>	
A Model and Simulation of Early-Stage Vision as a Developmental Sensorimotor Process . . . . .	11
<i>Olivier L. Georgeon, Mark A. Cohen, and Amélie V. Cordier</i>	
Enhanced Object Recognition in Cortex-Like Machine Vision . . . . .	17
<i>Aristeidis Tsitiridis, Peter W.T. Yuen, Izzati Ibrahim, Umar Soori, Tong Chen, Kan Hong, Zhengjie Wang, David James, and Mark Richardson</i>	

## Classification - Pattern Recognition

A New Discernibility Metric and Its Application on Pattern Classification and Feature Evaluation . . . . .	27
<i>Zacharias Voulgaris</i>	

## Financial and Management Applications of AI

Time Variations of Association Rules in Market Basket Analysis . . . . .	36
<i>Vasileios Papavasileiou and Athanasios Tsadiras</i>	
A Software Platform for Evolutionary Computation with Pluggable Parallelism and Quality Assurance . . . . .	45
<i>Pedro Evangelista, Jorge Pinho, Emanuel Gonçalves, Paulo Maia, João Luis Sobral, and Miguel Rocha</i>	
Financial Assessment of London Plan Policy 4A.2 by Probabilistic Inference and Influence Diagrams . . . . .	51
<i>Amin Hosseinian-Far, Elias Pimenidis, Hamid Jahankhani, and D.C. Wijeyesekera</i>	
Disruption Management Optimization for Military Logistics . . . . .	61
<i>Ayda Kaddoussi, Nesrine Zoghلامي, Hayfa Zgaya, Slim Hammadi, and Francis Bretaudeau</i>	

**Fuzzy Systems**

Using a Combined Intuitionistic Fuzzy Set-TOPSIS Method for Evaluating Project and Portfolio Management Information Systems . . . . 67  
*Vassilis C. Gerogiannis, Panos Fitsilis, and Achilles D. Kameas*

Fuzzy and Neuro-Symbolic Approaches to Assessment of Bank Loan Applicants . . . . . 82  
*Ioannis Hatzilygeroudis and Jim Prentzas*

Comparison of Fuzzy Operators for IF-Inference Systems of Takagi-Sugeno Type in Ozone Prediction . . . . . 92  
*Vladimír Olej and Petr Hájek*

LQR-Mapped Fuzzy Controller Applied to Attitude Stabilization of a Power-Aided-Unicycle . . . . . 98  
*Ping-Ho Chen, Wei-Hsiu Hsu, and Ding-Shinan Fong*

Optimal Fuzzy Controller Mapped from LQR under Power and Torque Constraints . . . . . 104  
*Ping-Ho Chen and Kuang-Yow Lian*

**Learning and Novel Algorithms**

A New Criterion for Clusters Validation . . . . . 110  
*Hosein Alizadeh, Behrouz Minaei, and Hamid Parvin*

Modeling and Dynamic Analysis on Animals’ Repeated Learning Process . . . . . 116  
*Mu Lin, Jinqiao Yang, and Bin Xu*

Generalized Bayesian Pursuit: A Novel Scheme for Multi-Armed Bernoulli Bandit Problems . . . . . 122  
*Xuan Zhang, B. John Oommen, and Ole-Christoffer Granmo*

**Recurrent and Radial Basis Function ANN**

A Multivalued Recurrent Neural Network for the Quadratic Assignment Problem . . . . . 132  
*Gracián Triviño, José Muñoz, and Enrique Domínguez*

Employing a Radial-Basis Function Artificial Neural Network to Classify Western and Transition European Economies Based on the Emissions of Air Pollutants and on Their Income . . . . . 141  
*Kyriaki Kitikidou and Lazaros Iliadis*

## Machine Learning

Elicitation of User Preferences via Incremental Learning in a Declarative Modelling Environment . . . . .	150
<i>Georgios Bardis, Vassilios Golfinopoulos, Dimitrios Makris, Georgios Miaoulis, and Dimitri Plemenos</i>	

Predicting Postgraduate Students' Performance Using Machine Learning Techniques . . . . .	159
<i>Maria Koutina and Katia Lida Kermanidis</i>	

## Generic Algorithms

Intelligent Software Project Scheduling and Team Staffing with Genetic Algorithms . . . . .	169
<i>Constantinos Stylianou and Andreas S. Andreou</i>	

## Data Mining

Comparative Analysis of Content-Based and Context-Based Similarity on Musical Data . . . . .	179
<i>C. Boletsis, A. Gratsani, D. Chasanidou, I. Karydis, and K. Kermanidis</i>	

Learning Shallow Syntactic Dependencies from Imbalanced Datasets: A Case Study in Modern Greek and English . . . . .	190
<i>Argiro Karozou and Katia Lida Kermanidis</i>	

A Random Forests Text Transliteration System for Greek Digraphia . . . . .	196
<i>Alexandros Panteli and Manolis Maragoudakis</i>	

Acceptability in Timed Frameworks with Intermittent Arguments . . . . .	202
<i>Maria Laura Cobo, Diego C. Martinez, and Guillermo R. Simari</i>	

Object Oriented Modelling in Information Systems Based on Related Text Data . . . . .	212
<i>Kolyo Onkov</i>	

## Reinforcement Learning

Ranking Functions in Large State Spaces . . . . .	219
<i>Klaus Häming and Gabriele Peters</i>	

## Web Applications of ANN

Modelling of Web Domain Visits by Radial Basis Function Neural Networks and Support Vector Machine Regression . . . . .	229
<i>Vladimír Olej and Jana Filipová</i>	

A Framework for Web Page Rank Prediction ..... 240  
*Elli Vouidigari, John Pavlopoulos, and Michalis Vazirgiannis*

Towards a Semantic Calibration of Lexical Word via EEG ..... 250  
*Marios Poulos*

**Medical Applications of ANN and Ethics of AI**

Data Mining Tools Used in Deep Brain Stimulation – Analysis  
 Results ..... 259  
*Oana Geman*

Reliable Probabilistic Prediction for Medical Decision Support ..... 265  
*Harris Papadopoulos*

Cascaded Window Memoization for Medical Imaging ..... 275  
*Farzad Khalvati, Mehdi Kianpour, and Hamid R. Tizhoosh*

Fast Background Elimination in Fluorescence Microbiology Images:  
 Comparison of Four Algorithms ..... 285  
*Shan Gong and Antonio Artés-Rodríguez*

Experimental Verification of the Effectiveness of Mammography Testing  
 Description’s Standardization ..... 291  
*Teresa Podsiadły-Marczykowska and Rafał Zawisłak*

Ethical Issues of Artificial Biomedical Applications ..... 297  
*Athanasios Alexiou, Maria Psixa, and Panagiotis Vlamos*

**Environmental and Earth Applications of AI**

ECOTRUCK: An Agent System for Paper Recycling ..... 303  
*Nikolaos Bezirgiannis and Ilias Sakellariou*

Prediction of CO and NOx levels in Mexico City Using Associative  
 Models ..... 313  
*Amadeo Argüelles, Cornelio Yáñez, Itzamá López, and  
 Oscar Camacho*

Neural Network Approach to Water-Stressed Crops Detection Using  
 Multispectral WorldView-2 Satellite Imagery ..... 323  
*Dubravko Čulibrk, Predrag Lugonja, Vladan Minić, and  
 Vladimir Crnojević*

A Generalized Fuzzy-Rough Set Application for Forest Fire Risk  
 Estimation Feature Reduction ..... 332  
*T. Tsatalzinos, L. Iliadis, and S. Spartalis*

Pollen Classification Based on Geometrical, Descriptors and Colour Features Using Decorrelation Stretching Method . . . . .	342
<i>Jaime R. Ticay-Rivas, Marcos del Pozo-Baños, Carlos M. Travieso, Jorge Arroyo-Hernández, Santiago T. Pérez, Jesús B. Alonso, and Federico Mora-Mora</i>	

## **Computational Intelligence in Software Engineering (CISE) Workshop**

Global Optimization of Analogy-Based Software Cost Estimation with Genetic Algorithms . . . . .	350
<i>Dimitrios Milios, Ioannis Stamelos, and Christos Chatzibagias</i>	
The Impact of Sampling and Rule Set Size on Generated Fuzzy Inference System Predictive Accuracy: Analysis of a Software Engineering Data Set . . . . .	360
<i>Stephen G. MacDonell</i>	
Intelligent Risk Identification and Analysis in IT Network Systems . . . . .	370
<i>Masoud Mohammadian</i>	
Benchmark Generator for Software Testers . . . . .	378
<i>Javier Ferrer, Francisco Chicano, and Enrique Alba</i>	
Automated Classification of Medical-Billing Data . . . . .	389
<i>R. Crandall, K.J. Lynagh, T. Mehoke, and N. Pepper</i>	

## **Artificial Intelligence Applications in Biomedicine (AIAB) Workshop**

Brain White Matter Lesions Classification in Multiple Sclerosis Subjects for the Prognosis of Future Disability . . . . .	400
<i>Christos P. Loizou, Efthymoulos C. Kyriacou, Ioannis Seimenis, Marios Pantziaris, Christodoulos Christodoulou, and Constantinos S. Pattichis</i>	
Using Argumentation for Ambient Assisted Living . . . . .	410
<i>Julien Marcais, Nikolaos Spanoudakis, and Pavlos Moraitis</i>	
Modelling Nonlinear Responses of Resonance Sensors in Pressure Garment Application . . . . .	420
<i>Timo Salpavaara and Pekka Kumpulainen</i>	
An Adaptable Framework for Integrating and Querying Sensor Data . . . . .	430
<i>Shahina Ferdous, Sarantos Kapidakis, Leonidas Fegaras, and Fillia Makedon</i>	

Feature Selection by Conformal Predictor . . . . .	439
<i>Meng Yang, Ilia Nouretdunov, Zhiyuan Luo, and Alex Gammerman</i>	
Applying Conformal Prediction to the Bovine TB Diagnosing . . . . .	449
<i>Dmitry Adamskiy, Ilia Nouretdinov, Andy Mitchell, Nick Coldham, and Alex Gammerman</i>	
Classifying Ductal Tree Structures Using Topological Descriptors of Branching . . . . .	455
<i>Angeliki Skoura, Vasileios Megalooikonomou, Predrag R. Bakic, and Andrew D.A. Maidment</i>	
Intelligent Selection of Human miRNAs and Mouse mRNAs Related to Obstructive Nephropathy . . . . .	464
<i>Ioannis Valavanis, P. Moulos, Ilias Maglogiannis, Julie Klein, Joost Schanstra, and Aristotelis Chatziioannou</i>	
Independent Component Clustering for Skin Lesions Characterization . . . . .	472
<i>S.K. Tasoulis, C.N. Doukas, I. Maglogiannis, and V.P. Plagianakos</i>	
A Comparison of Venn Machine with Platt’s Method in Probabilistic Outputs . . . . .	483
<i>Chenzhe Zhou, Ilia Nouretdinov, Zhiyuan Luo, Dmitry Adamskiy, Luke Randell, Nick Coldham, and Alex Gammerman</i>	
<b>Author Index . . . . .</b>	<b>491</b>

# Table of Contents – Part I

## Computer Vision and Robotics

ART-Based Fusion of Multi-modal Information for Mobile Robots . . . . .	1
<i>Elmar Berghöfer, Denis Schulze, Marko Tscherepanow, and Sven Wachsmuth</i>	

Vision-Based Autonomous Navigation Using Supervised Learning Techniques . . . . .	11
<i>Jefferson R. Souza, Gustavo Pessin, Fernando S. Osório, and Denis F. Wolf</i>	

## Self Organizing Maps

SOM-Based Clustering and Optimization of Production . . . . .	21
<i>Primož Potočnik, Tomaž Berlec, Marko Starbek, and Edvard Govekar</i>	

Behavioral Profiles for Building Energy Performance Using eXclusive SOM . . . . .	31
<i>Félix Iglesias Vázquez, Sergio Cantos Gaceo, Wolfgang Kastner, and José A. Montero Morales</i>	

## Classification - Pattern Recognition

Hypercube Neural Network Algorithm for Classification . . . . .	41
<i>Dominic Palmer-Brown and Chrisina Jayne</i>	

Improving the Classification Performance of Liquid State Machines Based on the Separation Property . . . . .	52
<i>Emmanouil Hourdakís and Panos Trahanías</i>	

A Scale-Changeable Image Analysis Method . . . . .	63
<i>Hui Wei, Bo Lang, and Qing-song Zuo</i>	

Induction of Linear Separability through the Ranked Layers of Binary Classifiers . . . . .	69
<i>Leon Bobrowski</i>	

Classifying the Differences in Gaze Patterns of Alphabetic and Logographic L1 Readers - A Neural Network Approach . . . . .	78
<i>André Frank Krause, Kai Essig, Li-Ying Essig-Shih, and Thomas Schack</i>	

Subspace-Based Face Recognition on an FPGA ..... 84  
*Pablo Pizarro and Miguel Figueroa*

A Window-Based Self-Organizing Feature Map (SOFM) for Vector  
 Filtering Segmentation of Color Medical Imagery ..... 90  
*Ioannis M. Stephanakis, George C. Anastassopoulos, and  
 Lazaros Iliadis*

**Financial and Management Applications of AI**

Neural Network Rule Extraction to Detect Credit Card Fraud ..... 101  
*Nick F. Ryman-Tubb and Paul Krause*

**Fuzzy Systems**

A Neuro-Fuzzy Hybridization Approach to Model Weather Operations  
 in a Virtual Warfare Analysis System ..... 111  
*D. Vijay Rao, Lazaros Iliadis, and Stefanos Spartalis*

Employing Smart Logic to Spot Audio in Real Time on Deeply  
 Embedded Systems ..... 122  
*Mario Malcangi*

**Support Vector Machines**

Quantization of Adulteration Ratio of Raw Cow Milk by Least  
 Squares Support Vector Machines (LS-SVM) and Visible/Near Infrared  
 Spectroscopy ..... 130  
*Ching-Lu Hsieh, Chao-Yung Hung, and Ching-Yun Kuo*

Support Vector Machines versus Artificial Neural Networks for Wood  
 Dielectric Loss Factor Estimation ..... 140  
*Lazaros Iliadis, Stavros Tachos, Stavros Avramidis, and  
 Shawn Mansfield*

**Learning and Novel Algorithms**

Time-Frequency Analysis of Hot Rolling Using Manifold Learning ..... 150  
*Francisco J. García, Ignacio Díaz, Ignacio Álvarez, Daniel Pérez,  
 Daniel G. Ordonez, and Manuel Domínguez*

**Reinforcement and Radial Basis Function ANN**

Application of Radial Bases Function Network and Response Surface  
 Method to Quantify Compositions of Raw Goat Milk with Visible/Near  
 Infrared Spectroscopy ..... 156  
*Ching-Lu Hsieh, Chao-Yung Hung, and Mei-Jen Lin*

Transferring Models in Hybrid Reinforcement Learning Agents . . . . .	162
<i>Anestis Fachantidis, Ioannis Partalas, Grigorios Tsoumakas, and Ioannis Vlahavas</i>	

## Machine Learning

Anomaly Detection from Network Logs Using Diffusion Maps . . . . .	172
<i>Tuomo Sipola, Antti Juvonen, and Joel Lehtonen</i>	
Large Datasets: A Mixed Method to Adapt and Improve Their Learning by Neural Networks Used in Regression Contexts . . . . .	182
<i>Marc Sauget, Julien Henriet, Michel Salomon, and Sylvain Contassot-Vivier</i>	

## Evolutionary Genetic Algorithms - Optimization

Evolutionary Algorithm Optimization of Edge Delivery Sites in Next Generation Multi-service Content Distribution Networks . . . . .	192
<i>Ioannis Stephanakis and Dimitrios Logothetis</i>	
Application of Neural Networks to Morphological Assessment in Bovine Livestock . . . . .	203
<i>Horacio M. González-Velasco, Carlos J. García-Orellana, Miguel Macías-Macías, Ramón Gallardo-Caballero, and Antonio García-Manso</i>	

## Web Applications of ANN

Object Segmentation Using Multiple Neural Networks for Commercial Offers Visual Search . . . . .	209
<i>I. Gallo, A. Nodari, and M. Vanetti</i>	

## Spiking ANN

Method for Training a Spiking Neuron to Associate Input-Output Spike Trains . . . . .	219
<i>Ammar Mohammed, Stefan Schliebs, Satoshi Matsuda, and Nikola Kasabov</i>	

## Feature Extraction - Minimization

Two Different Approaches of Feature Extraction for Classifying the EEG Signals . . . . .	229
<i>Pari Jahankhani, Juan A. Lara, Aurora Pérez, and Juan P. Valente</i>	

An Ensemble Based Approach for Feature Selection ..... 240  
*Behrouz Minaei-Bidgoli, Maryam Asadi, and Hamid Parvin*

A New Feature Extraction Method Based on Clustering for Face  
 Recognition ..... 247  
*Sabra El Ferchichi, Salah Zidi, Kaouther Laabidi,  
 Moufida Ksour, and Salah Maouche*

**Medical Applications of AI**

A Recurrent Neural Network Approach for Predicting Glucose  
 Concentration in Type-1 Diabetic Patients ..... 254  
*Fayrouz Allam, Zaki Nossai, Hesham Gomma,  
 Ibrahim Ibrahim, and Mona Abdelsalam*

Segmentation of Breast Ultrasound Images Using Neural Networks ..... 260  
*Ahmed A. Othman and Hamid R. Tizhoosh*

Knowledge Discovery and Risk Prediction for Chronic Diseases:  
 An Integrated Approach ..... 270  
*Anju Verma, Maurizio Fiasché, Maria Cuzzola,  
 Francesco C. Morabito, and Giuseppe Irrera*

Permutation Entropy for Discriminating ‘Conscious’ and ‘Unconscious’  
 State in General Anesthesia ..... 280  
*Nicoletta Nicolaou, Saverios Houris, Pandelitsa Alexandrou, and  
 Julius Georgiou*

**Environmental and Earth Applications of AI**

Determining Soil – Water Content by Data Driven Modeling When  
 Relatively Small Data Sets Are Available ..... 289  
*Milan Cisty*

A Neural Based Approach and Probability Density Approximation for  
 Fault Detection and Isolation in Nonlinear Systems ..... 296  
*P. Boi and A. Montisci*

A Neural Network Tool for the Interpolation of foF2 Data in the  
 Presence of Sporadic E Layer ..... 306  
*Haris Haralambous, Antonis Ioannou, and Harris Papadopoulos*

**Multi Layer ANN**

Neural Networks Approach to Optimization of Steel Alloys  
 Composition ..... 315  
*Petia Koprinkova-Hristova, Nikolay Tontchev, and Silviya Popova*

Predictive Automated Negotiators Employing Risk-Seeking and Risk-Averse Strategies . . . . .	325
<i>Marisa Masvoula, Constantin Halatsis, and Drakoulis Martakos</i>	
Maximum Shear Modulus Prediction by Marchetti Dilatometer Test Using Neural Networks . . . . .	335
<i>Manuel Cruz, Jorge M. Santos, and Nuno Cruz</i>	
NNIGnets, Neural Networks Software . . . . .	345
<i>Tânia Fontes, Vânia Lopes, Luís M. Silva, Jorge M. Santos, and Joaquim Marques de Sá</i>	
Key Learnings from Twenty Years of Neural Network Applications in the Chemical Industry . . . . .	351
<i>Aaron J. Owens</i>	

## Bioinformatics

Incremental- Adaptive- Knowledge Based- Learning for Informative Rules Extraction in Classification Analysis of aGvHD . . . . .	361
<i>Maurizio Fiasché, Anju Verma, Maria Cuzzola, Francesco C. Morabito, and Giuseppe Irrera</i>	

## The Applications of Soft Computing to Telecommunications (ASCOTE) Workshop

An Intelligent Approach to Detect Probe Request Attacks in IEEE 802.11 Networks . . . . .	372
<i>Deepthi N. Ratnayake, Hassan B. Kazemian, Syed A. Yusuf, and Azween B. Abdullah</i>	
An Intelligent Keyboard Framework for Improving Disabled People Computer Accessibility . . . . .	382
<i>Karim Ouazzane, Jun Li, and Hassan B. Kazemian</i>	
Finding 3G Mobile Network Cells with Similar Radio Interface Quality Problems . . . . .	392
<i>Pekka Kumpulainen, Mika Särkioja, Mikko Kylväjä, and Kimmo Hätönen</i>	
Analyzing 3G Quality Distribution Data with Fuzzy Rules and Fuzzy Clustering . . . . .	402
<i>Pekka Kumpulainen, Mika Särkioja, Mikko Kylväjä, and Kimmo Hätönen</i>	
Adaptive Service Composition for Meta-searching in a Mobile Environment . . . . .	412
<i>Ronnie Cheung and Hassan B. Kazemian</i>	

Simulation of Web Data Traffic Patterns Using Fractal Statistical Modelling . . . . . 422  
*Shanyu Tang and Hassan B. Kazemian*

**Computational Intelligence Applications in Bioinformatics (CIAB) Workshop**

Mathematical Models of Dynamic Behavior of Individual Neural Networks of Central Nervous System . . . . . 433  
*Dimitra-Despoina Paganian, Adam Adamopoulos, and Spiridon D. Likothanassis*

Towards Optimal Microarray Universal Reference Sample Designs: An *In-Silico* Optimization Approach . . . . . 443  
*George Potamias, Sofia Kaforou, and Dimitris Kafetzopoulos*

Information-Preserving Techniques Improve Chemosensitivity Prediction of Tumours Based on Expression Profiles . . . . . 453  
*E.G. Christodoulou, O.D. Røe, A. Folarin, and I. Tsamardinou*

Optimizing Filter Processes on Protein Interaction Clustering Results Using Genetic Algorithms . . . . . 463  
*Charalampos Moschopoulos, Grigorios Beligiannis, Sophia Kossida, and Spiridon Likothanassis*

Adaptive Filtering Techniques Combined with Natural Selection-Based Heuristic Algorithms in the Prediction of Protein-Protein Interactions . . . . . 471  
*Christos M. Dimitrakopoulos, Konstantinos A. Theofilatos, Efstratios F. Georgopoulos, Spyridon D. Likothanassis, Athanasios K. Tsakalidis, and Seferina P. Mavroudi*

**Informatics and Intelligent Systems Applications for Quality of Life information Services (ISQLIS) Workshop**

Investigation of Medication Dosage Influences from Biological Weather . . . . . 481  
*Kostas Karatzas, Marina Riga, Dimitris Voukantsis, and Åslög Dahl*

Combination of Survival Analysis and Neural Networks to Relate Life Expectancy at Birth to Lifestyle, Environment, and Health Care Resources Indicators . . . . . 491  
*Lazaros Iliadis and Kyriaki Kitikidou*

An Artificial Intelligence-Based Environment Quality Analysis System .....	499
<i>Mihaela Oprea and Lazaros Iliadis</i>	
Personalized Information Services for Quality of Life: The Case of Airborne Pollen Induced Symptoms .....	509
<i>Dimitris Voukantsis, Kostas Karatzas, Siegfried Jaeger, and Uwe Berger</i>	
Fuzzy Modeling of the Climate Change Effect to Drought and to Wild Fires in Cyprus .....	516
<i>Xanthos Papakonstantinou, Lazaros S. Iliadis, Elias Pimenidis, and Fotis Maris</i>	
<b>Author Index</b> .....	529
