Preface

In the past decade, computer networks have fundamentally influenced the ways in which information is exchanged and handled. Pervasive electronic devices make our everyday life easier, e.g., by helping us to connect with other people while being mobile, to use services available online, or to pay and use tolls and tickets. Many of the components employed routinely manage and distribute large amounts of data for different purposes. As these processes involve sensitive information, protecting information and the network with suitable security measures is more important than ever.

The objective of this workshop is to bring together researchers in the field of network security to discuss the open problems and future research directions.

Open Problems in Network Security
IFIP WG 11.4 International Workshop,
iNetSec 2017
Rome, Italy, May 2017

Program Chair

Doğan Kesdoğan University of Regensburg, Germany

Organising Chair

Vinh Pham University of Regensburg, Germany

Program Committee

Muhammad Ajmal	Newcastle University, UK
Roberto Di Pietro	Nokia Bell Labs, France
Hannes Federrath	University of Hamburg, Germany
Danilo Gligoroski	NTNU, Norway
Doğan Kesdoğan	University of Regensburg, Germany
Albert Levi	Sabanci University, Turkey
Giovanni Livraga	University of Milan, Italy
Javier Lopez	University of Malaga, Spain
Vinh Pham	University of Regensburg, Germany
Kai Rannenberg	Goethe University Frankfurt, Germany
Siraj A. Shaikh	Coventry University, UK

Table of Contents

Trust-Aware Security for Disruption-Tolerant Networks	1
<i>Vladimir Oleshchuk</i>	
Post Disaster Resilient Networks: Design Guidelines for Rescue Operations	10
<i>Tooska Dargahi, Sadaf Momeni, and Hosein Shafiei</i>	
Blockchain-based Public Key Infrastructure for Inter-Domain Secure Routing	20
<i>Alfonso de la Rocha Gómez-Arevalillo and Panos Papadimitratos</i>	
The Challenge of Private Identification	39
<i>Stig F. Mjølsetnes and Roxandra F. Olimid</i>	
Understanding Trustworthy Service Level Agreements: Open Problems and Existing Solutions	54
<i>Yudhistira Nugraha and Andrew Martin</i>
