Submitted on 2 Feb 2018 (v1), last revised 2 Feb 2018 (v2)

**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

## Research Context

« 48 Hours to generate ideas »  
CWS challenge by University of Lorraine

Continents culture

Complexities

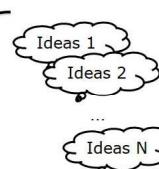

Industries and Educative Centers

Different students, collaborative work environments ...

"Organizational creativity depends on the abilities of the individuals within it"  
(Acar and Runco 2012)

CREATIVITY  
?

## Problem

MANAGE  
Classify  
Store  
Compare  
Evaluate

The format of idea-card's fields are heterogeneous as Khemiri idea in (Khemiri et al., n.d.)

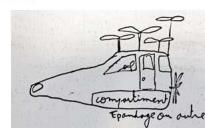

### Example:

Multifunction flying tractor

Équipe: Toulouse-équipe 13

#### Description détaillée:

propeller based conveyor (or futuristic propulsion) that would move in the air in any direction. It would include: - A cabin for two people (optimized in comfort: seat, radio, simple interface, nice) - Ventral compartment dedicated to the task at hand (fertilizer / pesticide / embedded system for data collection, etc.) - Support tools (GPS, etc.)

IDEA-CARD

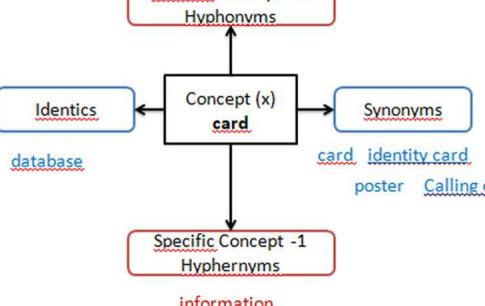

## Proposition

- 1 • To Design a Model to Highlight Knowledge
- 2 • To Propose a Semantic Approach to annotate Idea Cards
- 3 • To implement an Intelligent System for Innovation Management

## Model of Knowledge Organization

list [electronic database](#) [subdata base](#)

Generic Concept +1 Hyponyms

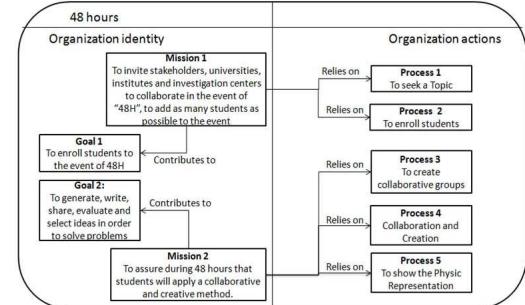

WordNet (WN31)

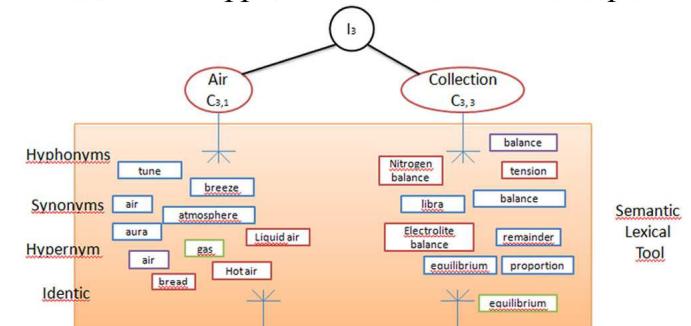

Perspectives

## Organizational Structure

To model the 48H with the meta-model KROM (Girodon et al. 2015a).

## Semantic Approach on Annotation Concepts

Implementation  
in  
Progress...

Our perspective is to built three models: Data Model, Annotation Model and Semantic Model and Knowledge Organization to obtain an Intelligent System Architecture for Innovation.
