Submitted on 3 Apr 2018

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Context and goals

- Evaluate the performance of VLC in different smart city applicative use cases such as smart objects
- Propose a series of smart city services based on VLC
- Propose an efficient communication protocol at the MAC layer to take into account the integration of VLC objects

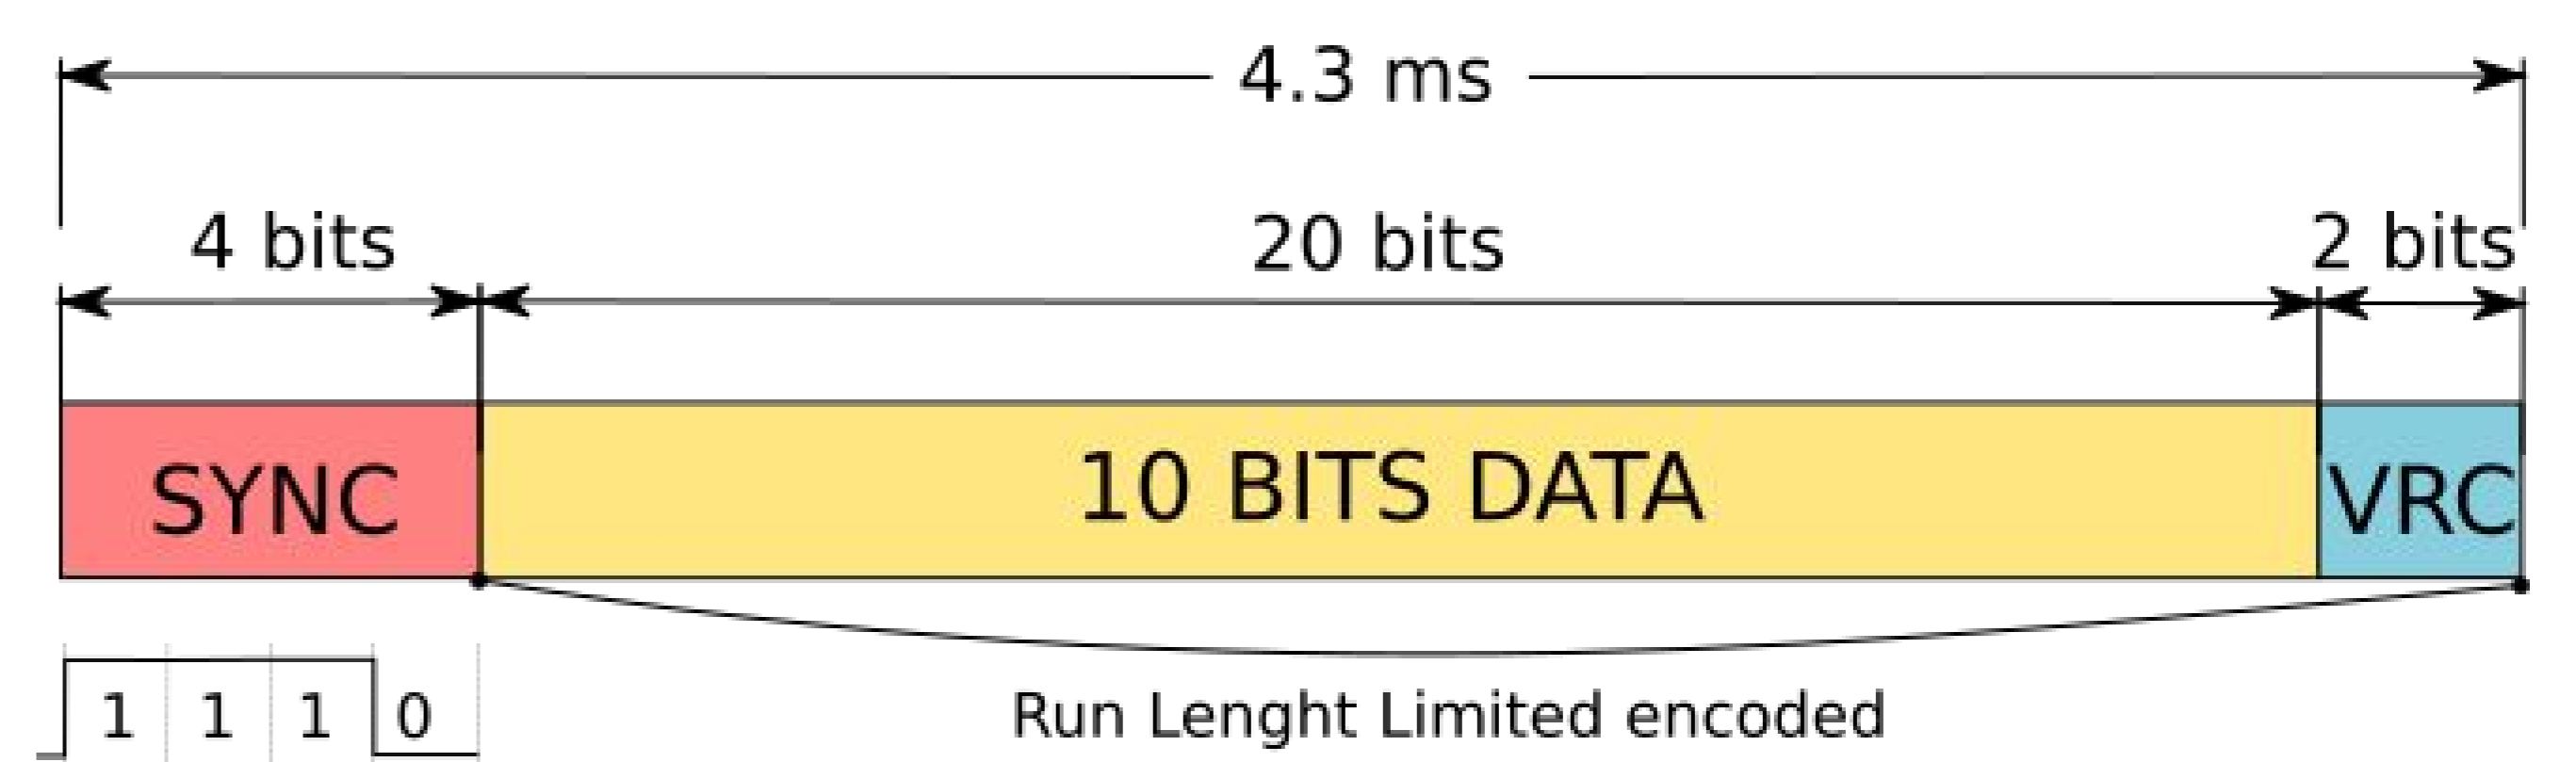

LEDs as Emitter

- IM/DD Modulations
 - On-Off Keying
 - Frequency Shift Keying
- Driven by cheap MCU

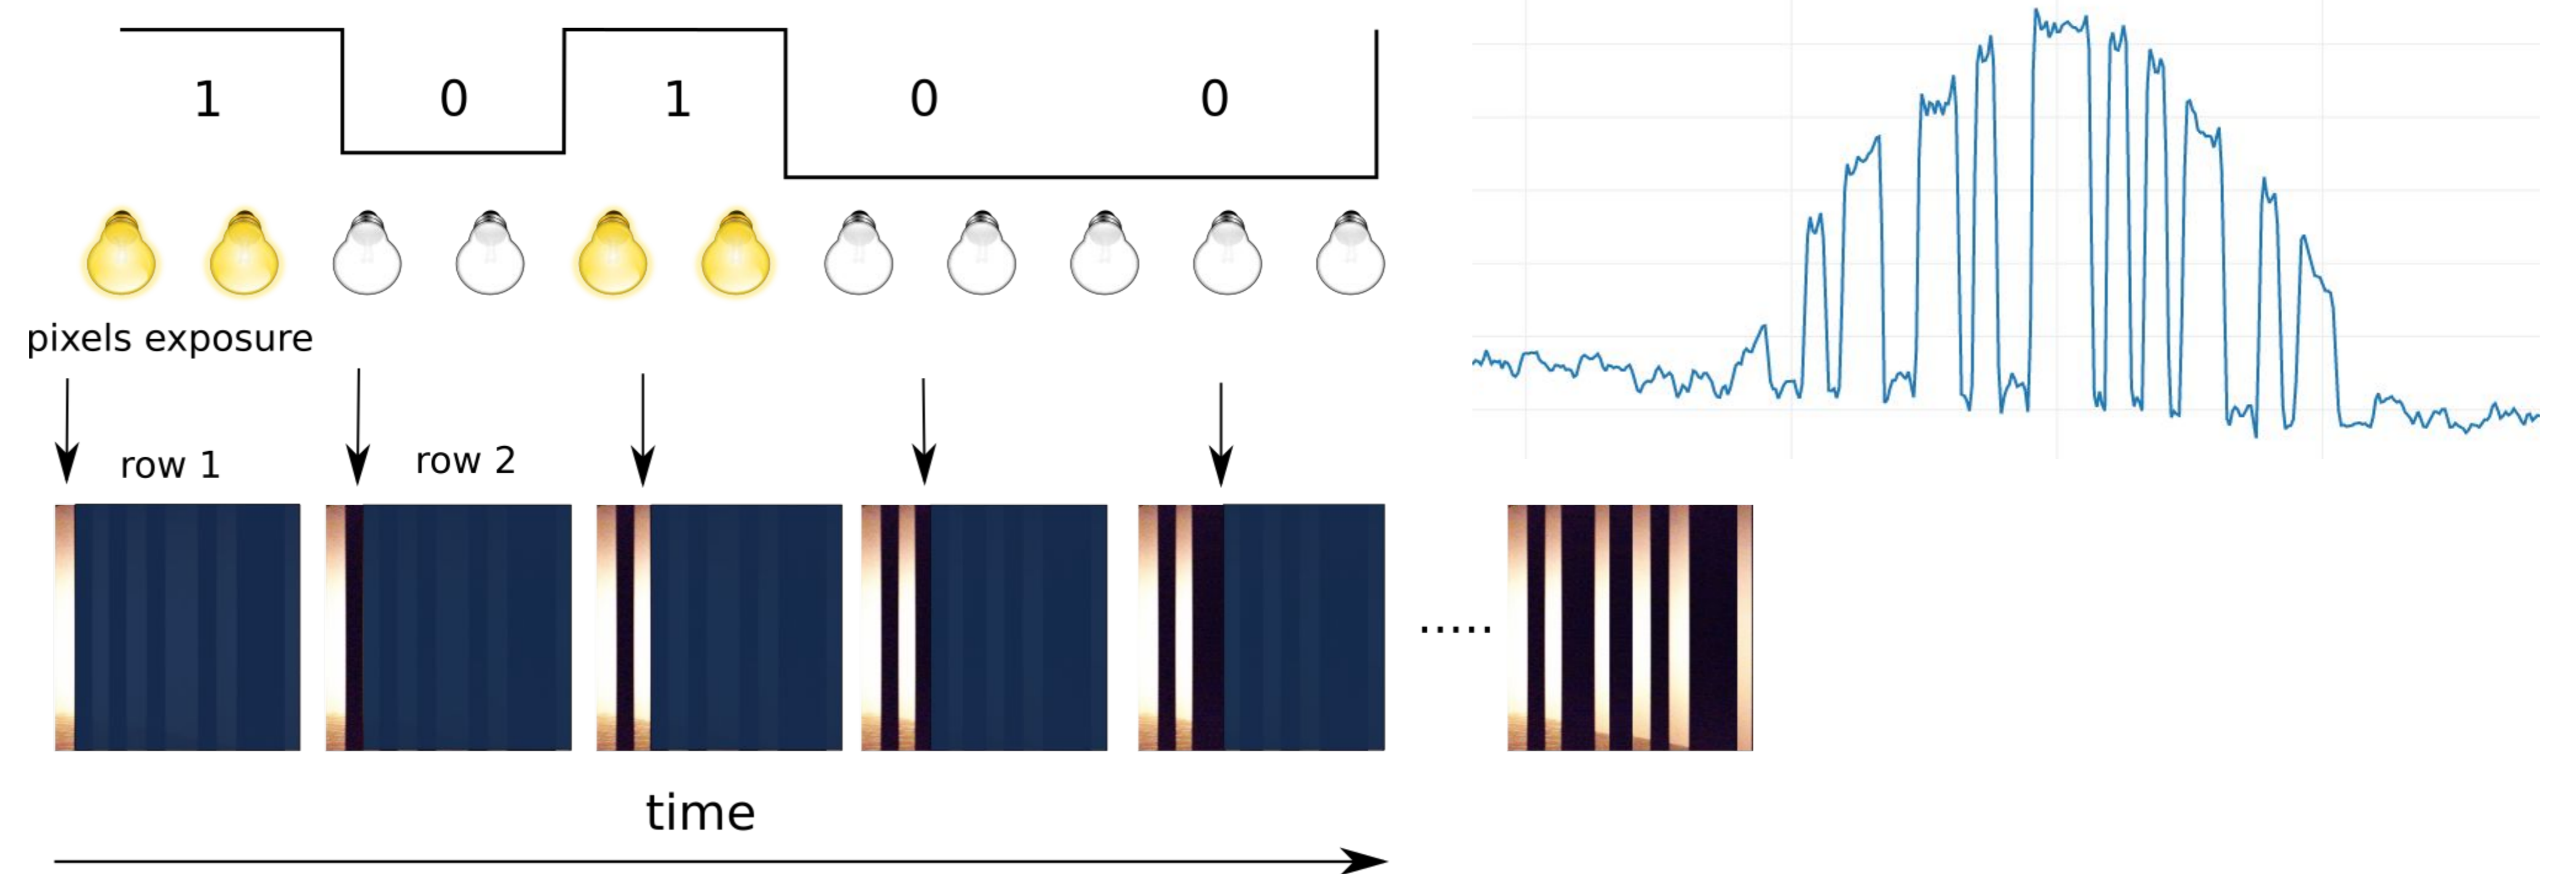

PHY Layer

- 6KHz OOK
- Manchester
- 500-4000 bit/s

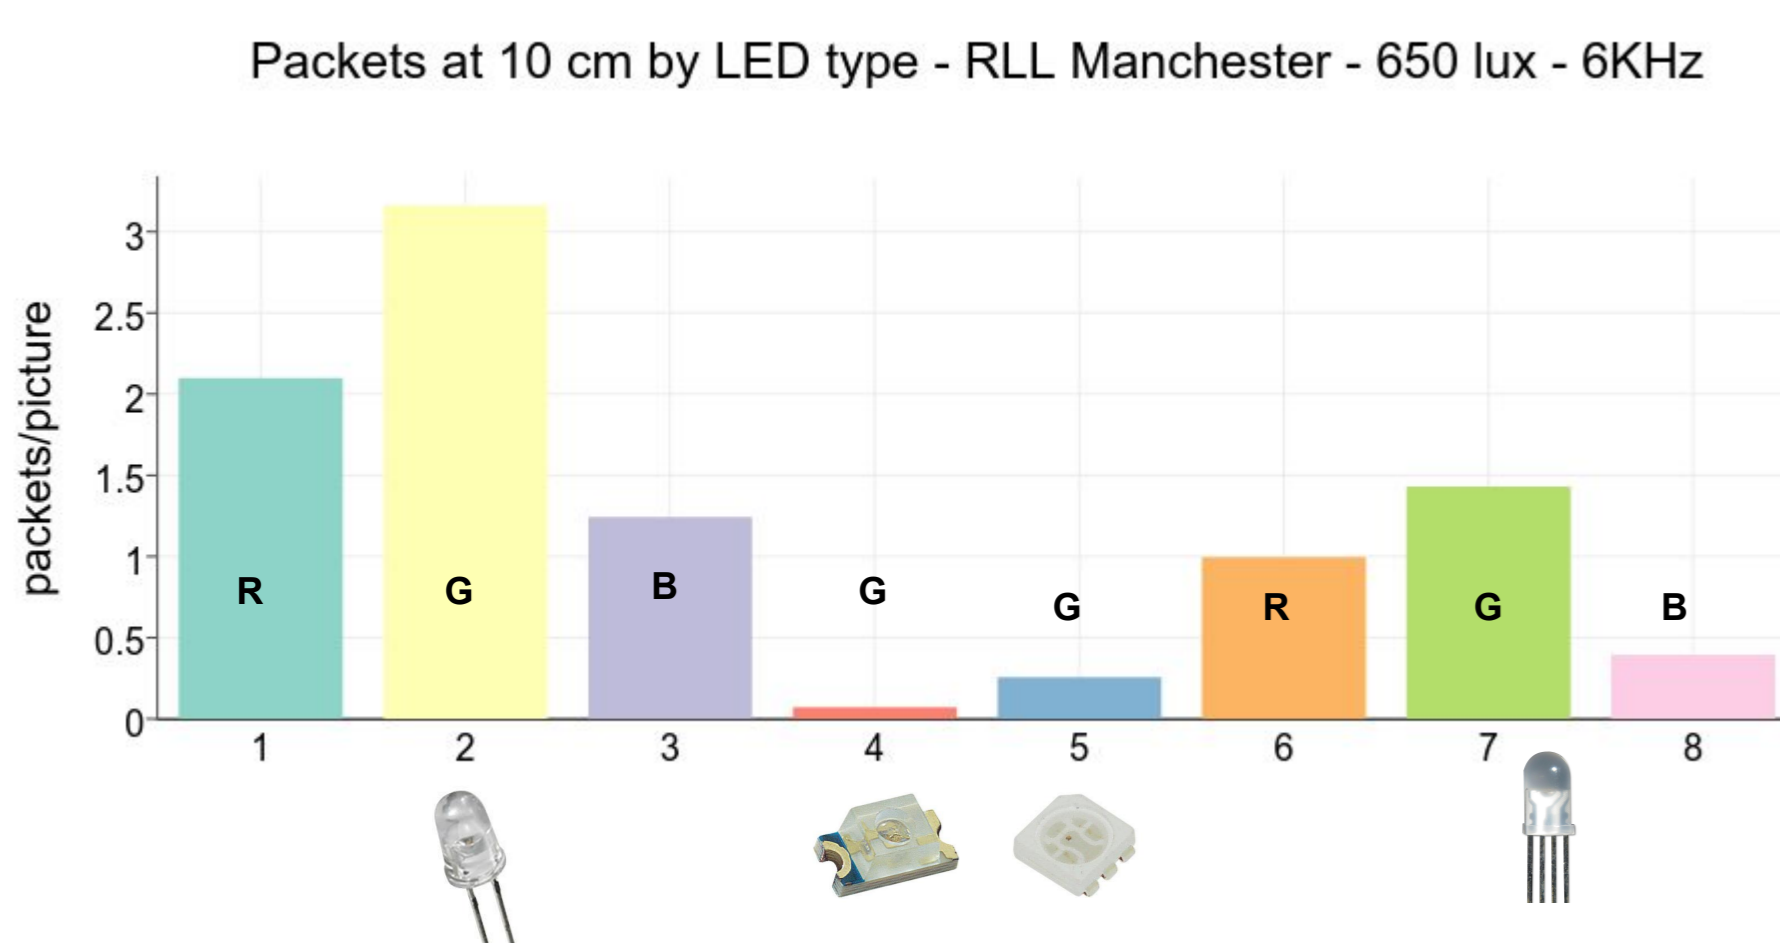

Smartphone as receiver

- Camera : CMOS Sensor
- Rolling Shutter Effect

Evaluation

LED type & color impact

Illumination impact

Achieved throughput

Angle impact

Packet Loss

PHY Bitrate

Use Cases

- Low cost wireless & smart device
- Accurate Indoor Localization
- Secured Near Field Communication
- Contextual Information broadcasting
