HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L’archive ouverte pluridisciplinaire HAL, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d’enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.
Proceedings of the 13th International Workshop on Implementation, Compilation, Optimization of Object-Oriented Languages, Programs and Systems

Co-located with the European Conference on Object-Oriented Programming (July 17, Amsterdam, Netherlands)

Organizers

Tim Felgentreff, Oracle Labs Potsdam, Germany
Olivier Zendra, INRIA / LORIA, France

With special thanks to all of our Program Committee members: Nada Amin, Clément Béra, Shigeru Chiba, Benoit Daloze, Görel Hedin, Eric Jul, Stefan Marr, Eliot Miranda, Sarah Mount, and Tobias Pape.

The ICOOOLPS workshop series brings together researchers and practitioners working in the field of language implementation and optimization. The goal of the workshop is to discuss emerging problems and research directions as well as new solutions to classic performance challenges.
# Table of Contents

1. *Assessing primitives performance on multi-stage execution*
   by Sophie Kaleba, Clément Béra, and Stéphane Ducasse  
   pages 1–10

2. *Maintaining Canonical Form After Edge Deletion*
   by Eric Fritz.  
   pages 11–22

3. *Extending SHAPES for SIMD Architectures - An approach to native support for Struct of Arrays in languages*
   by Alexandros Tasos, Juliana Franco, Tobias Wrigstad, Sophia Drossopoulou, and Susan Eisenbach  
   pages 23–27

4. *GraalSqueak: A Fast Smalltalk Bytecode Interpreter Written in an AST Interpreter Framework*
   by Fabio Niephaus, Tim Felgentreff, and Robert Hirschfeld  
   pages 28–33

5. *Shared Memory Implementations of Protocol Programming Languages, Data-Race-Free*
   by Micha Hergarden and Sung-Shik Jongmans.  
   pages 34–37
About the review process

All authors were asked to submit a paper for presentation at the workshop. Every paper was reviewed by at least three reviewers, who assessed the paper both for its quality to be presented at the workshop and inclusion in the post-workshop proceedings.

Number of papers initially submitted: 6
Number of papers accepted: 5
