HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

A Corrigendum on

Reconstructing Global Chlorophyll-a Variations Using a Non-linear Statistical Approach
by Martinez, E., Gorgues, T., Lengaigne, M., Fontana, C., Sauzède, R., Menkes, C., et al. (2020). *Front. Mar. Sci.* 7:464. doi: 10.3389/fmars.2020.00464

In the original article, there was a mistake in the labeling of the **Figures 11B** and **Figures 11D** color bar as published. The SST-Chl opposite relationship labels below the color bar were inverted between the green and yellow sections. The corrected **Figure 11** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
