**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers. L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

#### Foreword

The 15th International Federated Conference on Distributed Computing Techniques (DisCoTec 2020) took place during June 15–19, 2020. It was organized by the Department of Computer Science at the University of Malta, but was held online due to the abnormal circumstances worldwide affecting physical travel.

The DisCoTec series is one of the major events sponsored by the International Federation for Information Processing (IFIP). It comprises three conferences:

- The IFIP WG6.1 22nd International Conference on Coordination Models and Languages (COORDINATION 2020)
- The IFIP WG6.1 19th International Conference on Distributed Applications and Interoperable Systems (DAIS 2020)
- The IFIP WG6.1 40th International Conference on Formal Techniques for Distributed Objects, Components and Systems (FORTE 2020)

Together, these conferences cover a broad spectrum of distributed computing subjects, ranging from theoretical foundations and formal description techniques to systems research issues. As is customary, the event also included several plenary sessions in addition to the individual sessions of each conference, that gathered attendants from the three conferences. These included joint invited speaker sessions and a joint session for the best papers from the respective three conferences.

Associated with the federated event, two satellite events took place:

- The 13th International Workshop on Interaction and Concurrency Experience (ICE 2020)
- The First International Workshop on Foundations of Consensus and Distributed Ledgers (FOCODILE 2020)

I would like to thank the Program Committee chairs of the different events for their help and cooperation during the preparation of the conference, and the Steering Committee and Advisory Boards of DisCoTec and their conferences for their guidance and support. The organization of DisCoTec 2020 was only possible thanks to the dedicated work of the Organizing Committee, including Davide Basile and Francisco "Kiko" Fernández Reyes (publicity chairs), Antonis Achilleos, Duncan Paul Attard, and Ornela Dardha (workshop chairs), Lucienne Bugeja (logistics and finances), as well as all the students and colleagues who volunteered their time to help. Finally, I would like to thank IFIP WG6.1 for sponsoring this event, Springer's *Lecture Notes in Computer Science* team for their support and sponsorship, EasyChair for providing the reviewing framework, and the University of Malta for providing the support and infrastructure to host the event.

June 2020

Adrian Francalanza

#### Preface

This volume contains the papers presented at the 20th IFIP International Conference on Distributed Applications and Interoperable Systems (DAIS 2020), sponsored by the IFIP (International Federation for Information Processing) and organized by the IFIP WG6.1. The DAIS conference series addresses all practical and conceptual aspects of distributed applications, including their design, modeling, implementation, and operation, the supporting middleware, appropriate software engineering methodologies and tools, as well as experimental studies and applications.

DAIS 2020 was meant to be held during June 15–19, 2020, in Valletta, Malta, as part of DisCoTec, the 15th International Federated Conference on Distributed Computing Techniques. However, due to the COVID-19 pandemic, the organizers decided to turn the conference into a virtual event to be held completely online.

There were 30 initial abstract registrations for DAIS, which were then followed by 17 full papers. Each submission was reviewed by up to three Program Committee (PC) members. The review process included an in-depth discussion phase, during which the merits of all papers were discussed by the PC. The committee decided to accept ten full papers, one short paper, and one invited paper.

Accepted papers address challenges in multiple application areas, including system support for machine learning, security and privacy issues, experimental reproducibility and fault-tolerance, as well novel networking approaches for future network generations. Researchers continue the trend of focusing on trusted execution environments, for instance in the case of database systems. Instead, we notice fewer research efforts devoted to blockchain topics.

The virtual conference, especially during these last months full of unpredictable events, was made possible by the work and cooperation of many people working in several committees and organizations, all of which are listed in these proceedings. In particular, we are grateful to the Program Committee members for their commitment and thorough reviews and for their active participation in the discussion phase, and all the external reviewers for their help in evaluating submissions. Finally, we also thankful to the DisCoTec general chair, Adriano Francalanza, and the DAIS Steering Committee chair, Rui Oliveira, for their constant availability, support, and guidance.

June 2020

Anne Remke Valerio Schiavoni

# Organization

#### **General Chair**

Adrian Francalanza	University of Malta, Malta
--------------------	----------------------------

#### **Program Committee Chairs**

Anne Remke	University of Münster, Germany
Valerio Schiavoni	University of Neuchâtel, Switzerland

#### **Steering Committee**

Rocco De Nicola	IMT Lucca, Italy
Pascal Felber	University of Neuchâtel, Switzerland
Kurt Geihs	University of Kasel, Germany
Alberto Lluch Lafuente	DTU, Denmark
Kostas Magoutis	ICS-FORTH, Greece
Elie Najm (Chair)	Télécom ParisTech, France
Manuel Núñez	Universidad Complutense de Madrid, Spain
Rui Oliveira	University of Minho, Portugal
Jean-Bernard Stefani	Inria Grenoble, France
Gianluigi Zavattaro	University of Bologna, Italy

#### **Program Committee**

Pierre-Louis Aublin	Keio University, Japan
Sonia Ben Mokhtar	LIRIS-CNRS, France
Sara Bouchenak	INSA, France
Antoine Boutet	INSA, France
Silvia Bonomi	Università degli Studi di Roma La Sapienza, Italy
Damiano Di	University of Cambridge, UK
Francesco Maesa	
Davide Frey	Inria, France
Paula Herber	University of Münster, Germany
Mark Jelasity	University of Szeged, Hungary
Evangelia Kalyvianaki	University of Cambridge, UK
Vana Kalogeraki	Athens University of Economics and Business, Greece
Rüdiger Kapitza	Technical University of Braunschweig, Germany
João Leitão	Universidade Nova de Lisboa, Portugal
Daniel Lucani	Aarhus University, Denmark
Miguel Matos	INESC-ID, University of Lisboa, Portugal
Kostas Magoutis	University of Ioannina, Greece

Claudio Antares Mezzina	University of Urbino, Italy
Alberto Montresor	University of Trento, Italy
Daniel OKeeffe	Royal Holloway University of London, UK
Emanuel Onica	Alexandru Ioan Cuza University of Iasi, Romania
Marta Patino	Universidad Politecnica de Madrid, Spain
José Orlando Pereira	Universidade do Minho, INESC-TEC, Portugal
Hans P. Reiser	University of Passau, Germany
Etienne Riviére	École Polytechnique de Louvain, Belgium
Romain Rouvoy	University of Lille 1, France
Pierre Sutra	Télécom SudParis, France
Spyros Voulgaris	Athens University of Economics and Business, Greece

#### **Additional Reviewers**

Isabelly Rocha	University of Neuchâtel, Switzerland
Philipp Eichhammer	University of Passau, Germany
Christian Berger	University of Passau, Germany
Vania Marangozova-Martin	IMAG, France

# **DisCoTec Organizing Committee**

Adrian Francalanza	University of Malta, Malta
(General Chair)	
Davide Basile	ISTI-CNR, Italy
(Publicity Chair)	
Kiko Fernández-Reyes	Uppsala University, Sweden
(Publicity Chair)	
Antonis Achilleos	Reykjavik University, Iceland
(Workshops Chair)	
Duncan Attard	University of Malta, Malta
(Workshops Chair)	
Ornela Dardha	University of Glasgow, UK
(Workshops Chair)	
Lucienne Bugeja (Logistics)	University of Malta, Malta

## Contents

#### **Privacy and Security**

On the Trade-Offs of Combining Multiple Secure Processing Primitives	
for Data Analytics	3
Capturing Privacy-Preserving User Contexts with INDOORHASH Lakhdar Meftah, Romain Rouvoy, and Isabelle Chrisment	21
Cloud and Systems	
Towards Hypervisor Support for Enhancing the Performance of Virtual Machine Introspection Benjamin Taubmann and Hans P. Reiser	41
Fed-DIC: Diagonally Interleaved Coding in a Federated Cloud Environment <i>Giannis Tzouros and Vana Kalogeraki</i>	55
TailX: Scheduling Heterogeneous Multiget Queries to Improve   Tail Latencies in Key-Value Stores   Vikas Jaiman, Sonia Ben Mokhtar, and Etienne Rivière	73
Fault-Tolerance and Reproducibility	
Building a Polyglot Data Access Layer for a Low-Code Application Development Platform (Experience Report)	95
A Comparison of Message Exchange Patterns in BFT Protocols (Experience Report)	104
Kollaps/Thunderstorm: Reproducible Evaluation of Distributed Systems: Tutorial Paper	121

#### **Machine Learning for Systems**

Self-tunable DBMS Replication with Reinforcement Learning Luís Ferreira, Fábio Coelho, and José Pereira	
DroidAutoML: A Microservice Architecture to Automate the Evaluation of Android Machine Learning Detection Systems Yérom-David Bromberg and Louison Gitzinger	148
Distributed Algorithms	
A Resource Usage Efficient Distributed Allocation Algorithm for 5G Service Function Chains	169
A Self-stabilizing One-To-Many Node Disjoint Paths Routing Algorithm in Star Networks Rachid Hadid and Vincent Villain	186
