HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year. A federation for societies working in information processing, IFIP's aim is two-fold: to support information processing in the countries of its members and to encourage technology transfer to developing nations. As its mission statement clearly states:

IFIP is the global non-profit federation of societies of ICT professionals that aims at achieving a worldwide professional and socially responsible development and application of information and communication technologies.

IFIP is a non-profit-making organization, run almost solely by 2500 volunteers. It operates through a number of technical committees and working groups, which organize events and publications. IFIP's events range from large international open conferences to working conferences and local seminars.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is generally smaller and occasionally by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

IFIP distinguishes three types of institutional membership: Country Representative Members, Members at Large, and Associate Members. The type of organization that can apply for membership is a wide variety and includes national or international societies of individual computer scientists/ICT professionals, associations or federations of such societies, government institutions/government related organizations, national or international research institutes or consortia, universities, academies of sciences, companies, national or international associations or federations of companies.

Preface

The papers in this volume constitute the proceedings of a joint working conference organized by the IFIP Working Groups 8.2, 9.1, and 9.4. The conference, entitled “The future of digital work: the challenge of inequality,” was planned to take place during December 9–10, 2020, in Hyderabad, India. Due to the COVID-19 pandemic the conference was held virtually.

The call for papers resulted in a total of 29 submissions. Of these, 22 full papers were finally selected for presentation at the working conference. The submissions were selected through a blind-review process involving two reviewers and the editors. Authors of submissions that were selected for the next round were requested to revise their contributions in accordance with the reviewers’ and the editors’ recommendations. The revised submissions were then reviewed for publication in this volume. An introductory paper by the editors provides a thematic overview of these papers.

The papers published in this volume are complemented by contributions from the two keynote speakers at the conference: Renana Jhabvala and Michael Barrett.

Renana Jhabvala, Chairperson SEWA Bharat and Grih Rin Ltd, is an Indian social worker, who has been active for decades in organizing women in the informal economy into trade unions, co-operatives, and financial institutions in India, and has been extensively involved in policy issues relating to poor women and the informal economy.

Michael Barrett, Professor of Information Systems and Innovation Studies at the Cambridge Judge Business School, UK, has a long track record of engaging with social aspects of digital technologies, also with a view to the global south.

The editors would like to take this opportunity to thank all the contributors to this volume. We are very grateful to all the members of the Program Committee who participated in the review process. We give special thanks to Arunima S. Mukherjee and Divya Sharma for all their hard work on the conference organization. We would also like to recognize Eija Karsten, who has initiated the joint conference, working closely with the conference chairs Rajesh Chandwani, Shirin Madon, and Jungwoo Lee, who also took responsibility for the RIP stream, and Miriam Costales and her colleagues at Springer, who helped in producing these proceedings.

The local host organizations are the Indian Institute of Management, Ahmedabad, India, and Society for Health Information Systems Program – HISP India, New Delhi, India.

Contents

Introduction

- The Future of Digital Work: The Challenge of Inequality. 3
*Rajendra K. Bandi, Stefan Klein, Shirin Madon, Eric Monteiro,
and C. R. Ranjini*

Keynotes

- Overcoming Gender Inequality in the Digital World 13
Renana Jhabvala
- Risksapes and the Scaling of Digital Innovation: Trajectory Dynamics
of Mobile Payments in Times of Crisis 17
Michael Barrett

Innovation and Entrepreneurship

- Review of the Nexus Between Trust and Respect in Entrepreneurs'
Information-Seeking Behaviour. 23
Thao Orrensalo and Shahrokh Nikou
- Entrepreneurs and ICT Technology in the Dzaleka Refugee Camp 38
Suzana Brown and Patience Desire
- Perceptions of Rwanda's Research Environment in the Context
of Digitalization: Reflections on Deficit Discourses 50
Pamela Abbott and Andrew Cox

The Social Significance of Digital Platforms

- Surviving the Gig Economy in the Global South: How Cape Town
Domestic Workers Cope 67
Boitumelo Lesala Khethisa, Pitso Tsibolane, and Jean-Paul Van Belle
- Social Enablers and Constraints Related to the Publication and Use of Open
Government Data in a Developing Country 86
Hubeidatu Nuhu, Jean-Paul Van Belle, and Marita Turpin
- Attitudes Toward and Experiences of Digital Labour in South Africa 102
Cuthbert Chidoori and Jean-Paul Van Belle

Are Ride-Sharing Platforms Good for Indian Drivers? An Investigation of Taxi and Auto-Rickshaw Drivers in Delhi 117
