#### IFIP - The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year. A federation for societies working in information processing, IFIP's aim is two-fold: to support information processing in the countries of its members and to encourage technology transfer to developing nations. As its mission statement clearly states:

IFIP is the global non-profit federation of societies of ICT professionals that aims at achieving a worldwide professional and socially responsible development and application of information and communication technologies.

IFIP is a non-profit-making organization, run almost solely by 2500 volunteers. It operates through a number of technical committees and working groups, which organize events and publications. IFIP's events range from large international open conferences to working conferences and local seminars.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is generally smaller and occasionally by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

IFIP distinguishes three types of institutional membership: Country Representative Members, Members at Large, and Associate Members. The type of organization that can apply for membership is a wide variety and includes national or international societies of individual computer scientists/ICT professionals, associations or federations of such societies, government institutions/government related organizations, national or international research institutes or consortia, universities, academies of sciences, companies, national or international associations or federations of companies.

#### Preface

The papers in this volume constitute the proceedings of a joint working conference organized by the IFIP Working Groups 8.2, 9.1, and 9.4. The conference, entitled "The future of digital work: the challenge of inequality," was planned to take place during December 9–10, 2020, in Hyderabad, India. Due to the COVID-19 pandemic the conference was held virtually.

The call for papers resulted in a total of 29 submissions. Of these, 22 full papers were finally selected for presentation at the working conference. The submissions were selected through a blind-review process involving two reviewers and the editors. Authors of submissions that were selected for the next round were requested to revise their contributions in accordance with the reviewers' and the editors' recommendations. The revised submissions were then reviewed for publication in this volume. An introductory paper by the editors provides a thematic overview of these papers.

The papers published in this volume are complemented by contributions from the two keynote speakers at the conference: Renana Jhabvala and Michael Barrett.

Renana Jhabvala, Chairperson SEWA Bharat and Grih Rin Ltd, is an Indian social worker, who has been active for decades in organizing women in the informal economy into trade unions, co-operatives, and financial institutions in India, and has been extensively involved in policy issues relating to poor women and the informal economy.

Michael Barrett, Professor of Information Systems and Innovation Studies at the Cambridge Judge Business School, UK, has a long track record of engaging with social aspects of digital technologies, also with a view to the global south.

The editors would like to take this opportunity to thank all the contributors to this volume. We are very grateful to all the members of the Program Committee who participated in the review process. We give special thanks to Arunima S. Mukherjee and Divya Sharma for all their hard work on the conference organization. We would also like to recognize Eija Karsten, who has initiated the joint conference, working closely with the conference chairs Rajesh Chandwani, Shirin Madon, and Jungwoo Lee, who also took responsibility for the RIP stream, and Miriam Costales and her colleagues at Springer, who helped in producing these proceedings.

The local host organizations are the Indian Institute of Management, Ahmedabad, India, and Society for Health Information Systems Program – HISP India, New Delhi, India.

### Contents

Introduction	Int	tro	d	uc	tic	n
--------------	-----	-----	---	----	-----	---

The Future of Digital Work: The Challenge of Inequality	3
Keynotes	
Overcoming Gender Inequality in the Digital World	13
Riskscapes and the Scaling of Digital Innovation: Trajectory Dynamics of Mobile Payments in Times of Crisis	17
Innovation and Entrepreneurship	
Review of the Nexus Between Trust and Respect in Entrepreneurs' Information-Seeking Behaviour Thao Orrensalo and Shahrokh Nikou	23
Entrepreneurs and ICT Technology in the Dzaleka Refugee Camp Suzana Brown and Patience Desire	38
Perceptions of Rwanda's Research Environment in the Context of Digitalization: Reflections on Deficit Discourses	50

#### The Social Significance of Digital Platforms

Surviving the Gig Economy in the Global South: How Cape Town	
Domestic Workers Cope	67
Boitumelo Lesala Khethisa, Pitso Tsibolane, and Jean-Paul Van Belle	
Social Enablers and Constraints Related to the Publication and Use of Open	
Government Data in a Developing Country	86
Hubeidatu Nuhu, Jean-Paul Van Belle, and Marita Turpin	
Attitudes Toward and Experiences of Digital Labour in South Africa	102
Cuthbert Chidoori and Jean-Paul Van Belle	

Are Ride-Sharing Platforms Good for Indian Drivers? An Investigation of Taxi and Auto-Rickshaw Drivers in Delhi Anna Fleitoukh and Kentaro Toyama	117
Spatiotemporal (In)justice in Digital Platforms: An Analysis of Food-Delivery Platforms in South India Shyam Krishna	132
Understanding Platform Ecosystems for Development: Enabling Innovation in Digital Global Public Goods Software Platforms	148
Transforming Healthcare	
Power, Technology and Empowerment: A Case Study of Community Health Workers in India Priyanka Pandey and Yingqin Zheng	165
Practical Affordance: EMR Use Within Outpatient Consulting on Women's Health	180
Sustainability Qualifiers of Health Management Information Systems Implementation: Case Study of DHIS2 in India	194
Patients' Trust in Public Health System Mediated by Hospital Information Systems in Context of LMIC	207
Building Agility in Health Information Systems to Respond to the COVID-19 Pandemic: The Sri Lankan Experience Pamod Amarakoon, Jørn Braa, Sundeep Sahay, Pandula Siribaddana, and Roshan Hewapathirana	222
Rapid Systems Response to COVID-19: Standards Disseminated as Digital Health Packages	237
Designing for Scale: Strengthening Surveillance of Antimicrobial Resistance in Low Resource Settings Sundeep Sahay, Gitika Arora, Yogita Thakral, Ernst Kristian Rødland, and Arunima Sehgal Mukherjee	251

#### The Dark Side of Digitalisation

Digital Technology for Unmasking Labour Exploitation in Supply Chains Hannah Thinyane and Francisca Sassetti	267
In Technology We Trust? Human Skills & Intermediaries in Digital Retail Banking Soumyo Das and Bidisha Chaudhuri	281
The Five-Dimensional Space of the Futures of Work: A View to 2030 Erran Carmel and Steve Sawyer	295
Humanoid Social Robots and the Reconfiguration of Customer Service Gabriella Volpe, Matthias Schulte-Althoff, David Dillmann, Emmanuelle Maurer, Yannic Niedenzu, Philipp Schließer, and Daniel Fürstenau	310
The Role of Social Capital in Mediating ICT-Enabled Peace Building Efforts: A Case Study from Kenya Festus Mukoya and Arunima Sehgal Mukherjee	326
What Will the Future of Work Look like for IS Professionals?         The Picture of Portugal         Anabela Mesquita, Ana Paula Camarinha, Filomena Castro Lopes, and Pedro Malta	341
Author Index	359
