Preface

The increasing complexity of software and hardware systems and their ever more central role in society poses many challenges concerning their reliability, safety, correctness, and robustness. Based on a variety of fundamental concepts from theoretical computer science to formal methods techniques aimed at making a significant contribution to better quality systems. The development and use of formal methods aspire to mathematically sound methods and tools for system analysis and verification.

The present volume contains the post-proceedings of the 8th IPM International Conference on Fundamentals of Software Engineering (FSEN 2019), which was held in Tehran, Iran, during May 1–3, 2019. This two-yearly event is organized by the School of Computer Science at the Institute for Research in Fundamental Sciences (IPM) in Iran. The topics of interest in FSEN span over all aspects of formal methods, especially those related to advancing the application of formal methods in the software industry and promoting their integration with practical engineering techniques.

The Program Committee of FSEN 2019 consisted of 44 top researchers from 17 countries. In this edition of FSEN, 47 submissions were received from 19 countries. Each submission was reviewed by at least three independent referees, for its quality, originality, contribution, clarity of presentation, and its relevance to the conference topics. After thorough discussions on each individual paper, the referees selected 14 full papers and 3 short papers for inclusion in the present post-proceedings after a further review of their revised versions.

Many people contributed to making FSEN 2019 a success. First of all, we would like to thank all authors that submitted high-quality papers. Special thanks also go to the Institute for Research in Fundamental Sciences (IPM) in Tehran, Iran, for their financial support and for hosting FSEN 2019. We thank the distinguished keynote speakers for their excellent presentations: Rocco De Nicola, Giovanna Di Marzo Serugendo, and Martin Wirsing. We also thank the members of the Program Committee for their excellent contributions, making FSEN a high-quality international conference. Special thanks also go to the general chairs, Farhad Arbab and Hamid Sarbaziazad, and to the Steering Committee, in particular Marjan Sirjani, for their valuable support during all phases of the organization. We also thank the publicity chair Maurice ter Beek for the efficient publicity, the local organization chair Hamidreza Shahrabi and his wonderful team for their fantastic hospitality, as well as EasyChair and Springer for their facilities that greatly helped us run the review process and prepare the proceedings. Finally, we are indebted to all conference attendees for their active and lively participation, also through the presentation of more than 15 posters, ultimately contributing to the success of this special conference series.

Contents

Agent Based Systems

A Formal Model to Integrate Behavioral and Structural Adaptations in Self-adaptive Systems	3
<i>Narges Khakpour, Jetty Kleijn, and Marjan Sirjani</i>	
A Two-Dimensional Self-coordination Mechanism of Agents in a Minority Game.	20
<i>Sanaz Hasanzadeh Fard and Hadi Tabatabaee Malazi</i>	
A Persistent Entropy Automaton for the Dow Jones Stock Market	37
<i>Marco Piangerelli, Luca Tesei, and Emanuela Merelli</i>	

Theorem Proving

Proof Guidance in PVS with Sequential Pattern Mining.	45
<i>M. Saqib Nawaz, Meng Sun, and Philippe Fournier-Viger</i>	
Using PVS for Modeling and Verification of Probabilistic Connectors.	61
<i>M. Saqib Nawaz and Meng Sun</i>	
Greenify: A Game with the Purpose of Test Data Generation for Unit Testing	77
<i>Sharmin Moosavi, Hassan Haghghi, Hasti Sahabi, Farzam Vatanzade, and Mojtaba Vahidi Asl</i>	

Learning

Active Learning of Industrial Software with Data	95
<i>Lisette Sanchez, Jan Friso Grootte, and Ramon R. H. Schiffelers</i>	
An Experimental Study on Flakiness and Fragility of Randoop Regression Test Suites.	111
<i>Samad Paydar and Aidin Azammouri</i>	

Verification

Formalizing and Analyzing Security Ceremonies with Heterogeneous Devices in ANP and PDL	129
<i>Antonio González-Burgueño and Peter Csaba Ölveczky</i>	

Logics for Petri Nets with Propagating Failures 145
Leandro Gomes, Alexandre Madeira, and Mario Benevides

Verifying System-Wide Properties of Industrial
Component-Based Software 158
Thomas Neele, Marijn Rol, and Jan Friso Groot

Distributed Algorithms

Case Study on Certifying Distributed Algorithms: Reducing Intrusiveness . . . 179
Samira Akili and Kim Völlinger

Taming Hierarchical Connectors 186
José Proença and Alexandre Madeira

Service Orchestration with Priority Constraints 194
Behnaz Changizi, Natallia Kokash, and Farhad Arbab

Program Analysis

Modeling Non-deterministic C Code with Active Objects. 213
Nathan Wasser, Asmae Heydari Tabar, and Reiner Hähnle

Verification of Smart Contract Business Logic: Exploiting a Java
Source Code Verifier. 228
*Wolfgang Ahrendt, Richard Bubel, Joshua Ellul, Gordon J. Pace,
Raúl Pardo, Vincent Rebiscoul, and Gerardo Schneider*

An Approach to Generate Effective Fault Localization Methods
for Programs 244
Babak Bagheri, Mohammad Rezaalipour, and Mojtaba Vahidi-Asl

Correction to: Verifying System-Wide Properties of Industrial
Component-Based Software C1
Thomas Neele, Marijn Rol, and Jan Friso Groot
