HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

IFIP – The International Federation for Information Processing

IFIP was founded in 1960 under the auspices of UNESCO, following the first World Computer Congress held in Paris the previous year. A federation for societies working in information processing, IFIP's aim is two-fold: to support information processing in the countries of its members and to encourage technology transfer to developing nations. As its mission statement clearly states:

IFIP is the global non-profit federation of societies of ICT professionals that aims at achieving a worldwide professional and socially responsible development and application of information and communication technologies.

IFIP is a non-profit-making organization, run almost solely by 2500 volunteers. It operates through a number of technical committees and working groups, which organize events and publications. IFIP's events range from large international open conferences to working conferences and local seminars.

The flagship event is the IFIP World Computer Congress, at which both invited and contributed papers are presented. Contributed papers are rigorously refereed and the rejection rate is high.

As with the Congress, participation in the open conferences is open to all and papers may be invited or submitted. Again, submitted papers are stringently refereed.

The working conferences are structured differently. They are usually run by a working group and attendance is generally smaller and occasionally by invitation only. Their purpose is to create an atmosphere conducive to innovation and development. Refereeing is also rigorous and papers are subjected to extensive group discussion.

Publications arising from IFIP events vary. The papers presented at the IFIP World Computer Congress and at open conferences are published as conference proceedings, while the results of the working conferences are often published as collections of selected and edited papers.

IFIP distinguishes three types of institutional membership: Country Representative Members, Members at Large, and Associate Members. The type of organization that can apply for membership is a wide variety and includes national or international societies of individual computer scientists/ICT professionals, associations or federations of such societies, government institutions/government related organizations, national or international research institutes or consortia, universities, academies of sciences, companies, national or international associations or federations of companies.

Preface

We live in a time where just one factor (i.e., COVID-19) could change the game plan for the global manufacturing economy. Digital transformation has been going on in the last decade, and it seems that not all the countries and companies are utilizing all the opportunities that it could provide to build new digital capabilities such as ‘digital resilience.’ A digital transformation path towards Industry 4.0 in manufacturing is more important than ever. Yet, how to approach the development and scaling of digital technology is a question that keeps executives awake at night and academics in a constant quest. The current digital transformation of manufacturing has so far mostly been studied from the perspective of the cyber-physical production system as drivers of change. However, there are several other enablers, including artificial intelligence; additive and hybrid manufacturing; 5G-enabled manufacturing; digital assistance systems based on augmented, virtual, and mixed reality; industrial, collaborative, mobile, and software robots; advanced simulations; cloud and edge technologies; and data-driven product-service systems. These are the key components of a digital transformation and the main research thrusts in the production management systems research community. Thus, the question of how to find the path to the digital transformation and innovation of production management systems is of eminent importance.

The International Conference on Advances in Production Management Systems (APMS 2020) in Novi Sad, Serbia, brought together leading international experts from academia, industry, and government in the area of digital transformation and innovation to discuss globally pressing issues in smart manufacturing, operations management, and supply chain management in the Industry 4.0 era. Under influence of COVID-19, the event was also digitally transformed: For the first time in its history the APMS conference was organized in a ‘hybrid mode,’ meaning face-to-face as well as online conference sessions. A large international panel of experts reviewed all the papers and selected the best ones to be included in these international conference proceedings. The topics of interest in APMS 2020 included Digital Supply Networks, Data-Driven Production Management, Sustainable Production Management, Cloud and Collaborative Technologies, Smart Manufacturing and Industry 4.0, Data-Driven Services, Digital Lean Manufacturing, and Digital Transformation Approaches in Production Management.

The proceedings are organized into two parts:

- The Path to Digital Transformation and Innovation of Production Management Systems (Volume 1)
- Towards Smart and Digital Manufacturing (Volume 2)

The conference was supported by the International Federation of Information Processing (IFIP) and was organized by the IFIP Working Group 5.7 on Advances in Production Management Systems and University of Novi Sad, Faculty of Technical Sciences, Department of Industrial Engineering and Management. We would like to

thank all contributors for their high-quality work and for their willingness to share their innovative ideas and findings. We are also indebted to the members of the IFIP Working Group 5.7, the Program Committee members, and the Scientific Committee members for their support in the review process of the papers. Finally, we appreciate the generous support from both the Ministry of Education, Science and Technological Development and Provincial Secretariat for Higher Education and Scientific Research of the Republic of Serbia.

Contents – Part II

The Operator 4.0: New Physical and Cognitive Evolutionary Paths

Facilitating Operator Participation in Continuous Improvement: An Investigation of Organizational Factors	3
<i>Eirin Lodgaard, Silje Helene Aschehoug, and Daryl Powell</i>	
Improving the Safety of Using Didactic Setups by Applying Augmented Reality	11
<i>Srdjan Tegeltija, Vule Reljić, Ivana Šenk, Laslo Tarjan, and Branislav Tejić</i>	
Production Management as-a-Service: A Softbot Approach.	19
<i>Brunno Abner, Ricardo J. Rabelo, Saulo P. Zambiasi, and David Romero</i>	
Knowledge Strategies for Organization 4.0 – A Workforce Centric Approach	31
<i>Magnus Bjerkne Gerdin, Åsa Fast-Berglund, Dan Li, and Adam Palmquist</i>	
Challenges for the Operator 3.0 Addressed Through the Enabling Technologies of the Operator 4.0	37
<i>Malin Tarrar, Peter Thorvald, Åsa Fast-Berglund, and David Romero</i>	
Agent- and Skill-Based Process Interoperability for Socio-Technical Production Systems-of-Systems.	46
<i>Åsa Fast-Berglund, David Romero, Magnus Åkerman, Björn Hodig, and Andreas Pichler</i>	
Digital Transformation Approaches in Production Management	
Challenges in Data Life Cycle Management for Sustainable Cyber-Physical Production Systems	57
<i>Mélanie Despeisse and Ebru Turanoglu Bekar</i>	
Explainable AI in Manufacturing: A Predictive Maintenance Case Study	66
<i>Bahrudin Hrnjica and Selver Softic</i>	
Retrofit Concept for Textile Production	74
<i>Felix Franke, Susanne Franke, and Ralph Riedel</i>	

Organizational Enablers for Digitalization in Norwegian Industry	83
<i>Lars Harald Lied, Maria Flavia Mogos, and Daryl John Powell</i>	
Concept of PLM Application Integration with VR and AR Techniques	91
<i>Jan Duda and Sylwester Oleszek</i>	
The Big Potential of Big Data in Manufacturing: Evidence from Emerging Economies	100
<i>Marko Pavlović, Uglješa Marjanović, Slavko Rakić, Nemanja Tasić, and Bojan Lalić</i>	
A Conceptual Model for Deploying Digitalization in SMEs Through Capability Building	108
<i>Zuhara Chavez, Jannicke Baalsrud Hauge, and Monica Bellgran</i>	
The Potential of Game Development Platforms for Digital Twins and Virtual Labs: Case Study of an Energy Analytics and Solution Lab.	117
<i>Ali Abdallah, Matthias Primas, Ioan Turcin, and Udo Traussnigg</i>	
The Application of ICT Solutions in Manufacturing Companies in Serbia	122
<i>Danijela Ciric, Teodora Lolic, Danijela Gracanin, Darko Stefanovic, and Bojan Lalic</i>	
Achieving Business Model Innovation with the Personalized Product Business Model Radar Template	130
<i>Egon Lüftenegger</i>	
Integrating Electronic Components into 3D Printed Parts to Develop a Digital Manufacturing Approach.	138
<i>Ioan Turcin, Ali Abdallah, Manfred Pauritsch, Cosmin Cosma, and Nicolae Balc</i>	
Digital Transformation and Its Potential Effects on Future Management: Insights from an ETO Context	146
<i>Antoni Vike Danielsen</i>	
Applying Contextualization for Data-Driven Transformation in Manufacturing.	154
<i>Sonika Gogineni, Kai Lindow, Jonas Nickel, and Rainer Stark</i>	
Digital Transformation for more Sustainable Supply Chains	
Smart Contract-Based Blockchain Solution to Reduce Supply Chain Risks.	165
<i>Fabian Dietrich, Ali Turgut, Daniel Palm, and Louis Louw</i>	
Towards Sustainability: The Manufacturers’ Perspective.	174
<i>Olena Klymenko, Lise Lillebrygfeld Halse, and Bjørn Jæger</i>	

Data-Driven Applications in Smart Manufacturing and Logistics Systems

Smart Factory Competitiveness Based on Real Time Monitoring and Quality Predictive Model Applied to Multi-stages Production Lines.	185
<i>Nicola Gramegna, Fabrizio Greggio, and Franco Bonollo</i>	
A New Application of Coordination Contracts for Supplier Selection in a Cloud Environment.	197
<i>Reza Tavakkoli-Moghaddam, Mohammad Alipour-Vaezi, and Zahra Mohammad-Nazari</i>	
Workforce Assignment with a Different Skill Level for Automotive Parts Assembly Lines	206
<i>Hyungjoon Yang, Je-Hun Lee, and Hyun-Jung Kim</i>	
A Framework of Data-Driven Dynamic Optimisation for Smart Production Logistics	213
<i>Sichao Liu, Lihui Wang, Xi Vincent Wang, and Magnus Wiktorsson</i>	
Decentralized Industrial IoT Data Management Based on Blockchain and IPFS	222
<i>Xiaochen Zheng, Jinzhi Lu, Shengjing Sun, and Dimitris Kiritis</i>	
Integrated Platform and Digital Twin Application for Global Automotive Part Suppliers	230
<i>Jinho Yang, Sangho Lee, Yong-Shin Kang, Sang Do Noh, Sung Soo Choi, Bo Ra Jung, Sang Hyun Lee, Jeong Tae Kang, Dae Yub Lee, and Hyung Sun Kim</i>	
Analyzing the Characteristics of Digital Twin and Discrete Event Simulation in Cyber Physical Systems	238
<i>Erik Flores-García, Goo-Young Kim, Jinho Yang, Magnus Wiktorsson, and Sang Do Noh</i>	
Streaming Analytics in Edge-Cloud Environment for Logistics Processes	245
<i>Moritz von Stietencron, Marco Lewandowski, Katerina Lepenioti, Alexandros Bousdekis, Karl Hribernik, Dimitris Apostolou, and Gregoris Mentzas</i>	
An Improvement in Master Surgical Scheduling Using Artificial Neural Network and Fuzzy Programming Approach.	254
<i>Ahmad Ghasemkhani, Reza Tavakkoli-Moghaddam, Mahdi Hamid, and Mehdi Mahmoodjanloo</i>	
SKOS Tool: A Tool for Creating Knowledge Graphs to Support Semantic Text Classification.	263
<i>Farhad Ameri, Reid Yoder, and Kimia Zandbiglari</i>	

Data-Driven Services: Characteristics, Trends and Applications

The Successful Commercialization of a Digital Twin in an Industrial Product Service System	275
<i>Oliver Stoll, Shaun West, Paolo Gaiardelli, David Harrison, and Fintan J. Corcoran</i>	
Using Service Dominant Logic to Assess the Value Co-creation of Smart Services	283
<i>Oliver Stoll, Shuan West, and Cosimo Barbieri</i>	
Engineering of Data-Driven Service Systems for Smart Living: Application and Challenges	291
<i>Henrik Kortum, Laura Sophie Gravemeier, Novica Zarvic, Thomas Feld, and Oliver Thomas</i>	
The Role of Service Business Models in the Manufacturing of Transition Economies	299
<i>Slavko Rakic, Nenad Simeunovic, Nenad Medic, Marko Pavlovic, and Ugljesa Marjanovic</i>	
System Architecture Analysis with Network Index in MBSE Approach - Application to Smart Interactive Service with Digital Health Modeling-	307
<i>Toshiya Kaihara, Nobutada Fujii, Daisuke Kokuryo, and Mizuki Harada</i>	
The Data-Driven Product-Service Systems Design and Delivery (4DPSS) Methodology	314
<i>Roberto Sala, Alessandro Bertoni, Fabiana Pirola, and Giuditta Pezzotta</i>	
Data-Driven Maintenance Delivery Framework: Test in an Italian Company	322
<i>Roberto Sala, Fabiana Pirola, and Giuditta Pezzotta</i>	
Towards a Comparative Data Value Assessment Framework for Smart Product Service Systems	330
<i>Lennard Holst, Volker Stich, Günther Schuh, and Jana Frank</i>	
Impact of Platform Openness on Ecosystems and Value Streams in Platform-Based PSS Exemplified Using RAMI 4.0	338
<i>Michela Zambetti, Till Blüher, Giuditta Pezzotta, Konrad Exner, Roberto Pinto, and Rainer Stark</i>	
Industry 4.0 Data-Related Technologies and Servitization: A Systematic Literature Review	347
<i>Michela Zambetti, Roberto Pinto, and Giuditta Pezzotta</i>	

A Framework to Support Value Co-creation in PSS Development.	361
<i>Martha Orellano, Xavier Boucher, Gilles Neubert, and Anne Coulon</i>	

The Future of Lean Thinking and Practice

Utilizing Lean Thinking as a Means to Digital Transformation in Service Organizations	371
<i>F. P. Santhiapillai and R. M. Chandima Ratnayake</i>	

On the Need of Functional Priority and Failure Risk Assessment to Optimize Human Resource Allocation in Public Service Organizations	379
<i>F. P. Santhiapillai and R. M. Chandima Ratnayake</i>	

Assessing the Value of Process Improvement Suggestions	387
<i>Torbjørn H. Netland, Hajime Mizuyama, and Rafael Lorenz</i>	

On the Necessity for Identifying Waste in Knowledge Work Dominated Projects: A Case Study from Oil & Gas-Related Product Development Projects	396
<i>F. P. Santhiapillai and R. M. Chandima Ratnayake</i>	

Lean Thinking: From the Shop Floor to an Organizational Culture	406
<i>Paulo Amaro, Anabela C. Alves, and Rui M. Sousa</i>	

Digital Lean Manufacturing and Its Emerging Practices

A Learning Roadmap for Digital Lean Manufacturing	417
<i>Anja Bottinga Solheim and Daryl John Powell</i>	

Investigating the Challenges and Opportunities for Production Planning and Control in Digital Lean Manufacturing	425
<i>Daryl Powell, Eirin Lodgaard, and Heidi Dreyer</i>	

New Forms of Gemba Walks and Their Digital Tools in the Digital Lean Manufacturing World	432
<i>David Romero, Paolo Gaiardelli, Thorsten Wuest, Daryl Powell, and Matthias Thürer</i>	

New Reconfigurable, Flexible or Agile Production Systems in the Era of Industry 4.0

A Computational Method for Identifying the Optimum Buffer Size in the Era of Zero Defect Manufacturing	443
<i>Foivos Psarommatis, Ali Boujemaoui, and Dimitris Kiritsis</i>	

A Bi-objective Scheduling Model for Additive Manufacturing with Multiple Materials and Sequence-Dependent Setup Time	451

Production Ramp-Up Strategies for Product

Part Selection for Freeform Injection Molding: Framework for Development of a Unique Methodology	723
<i>Elham Sharifi, Atanu Chaudhuri, Brian Vejrum Wæhrens, Lasse G. Staal, and Saeed D. Farahani</i>	
A Model for Cost-Benefit Analysis of Production Ramp-up Strategies	731
<i>Khaled Medini, Antoine Pierné, John Ahmet Erkoyuncu, and Christian Cornet</i>	
Key Factors on Utilizing the Production System Design Phase for Increasing Operational Performance	740
<i>Md Hasibul Islam, Zuhara Chavez, Seyoum Eshetu Birkie, and Monica Bellgran</i>	
Business Model Development for a Dynamic Production Network Platform	749
<i>Stefan Wiesner, Larissa Behrens, and Jannicke Baalsrud Hauge</i>	
Changeable Closed-Loop Manufacturing Systems: A Case Study of Challenges in Product Take-Back	758
<i>Markus Thomas Bockholt, Ann-Louise Andersen, Thomas Ditlev Brunoe, Jesper Hemdrup Kristensen, Michele Colli, Peter Meulengracht Jensen, and Brian Vejrum Wæhrens</i>	
Author Index	767

Contents – Part I

Advanced Modelling, Simulation and Data Analytics in Production and Supply Networks

A Robust Multi-commodity Rebalancing Process in Humanitarian Logistics	3
<i>Xuehong Gao and Xuefeng Jin</i>	
Towards a Unified Reliability-Centered Information Logistics Model for Production Assets	11
<i>Florian Defèr, Günther Schuh, and Volker Stich</i>	
Characterization of Energy Consumers in Production Systems with Renewable On-Site Power Generation	19
<i>Julia Schulz, Felix Rosenberg, Valerie M. Scharmer, and Michael F. Zaeh</i>	
A Simulation Model Supporting the Production Optimization for High-Precision Machines Assembly	28
<i>Andrea Monti, Donatella Corti, and Dario Pietraroia</i>	
Agent-Based Modeling and Analysis of Dynamic Slab Yard Management in a Steel Factory	37
<i>Hajime Mizuyama</i>	
A Simulation Analysis of Part Feeding to Assembly Stations with Vertical Robotic Storage and Retrieval Systems	45
<i>Elena Tappia, Emilio Moretti, and Marco Melacini</i>	
Process Mining in Manufacturing: Goals, Techniques and Applications	54
<i>Darko Stefanovic, Dusanka Dakic, Branislav Stevanov, and Teodora Lolic</i>	
Bayesian Modelling for Product Testing and Release.	63
<i>John G. Wilson</i>	

Advanced, Digital and Smart Manufacturing

The Use of Organizational Innovation Concepts in Manufacturing Companies	73
<i>Iztok Palčič, Simon Klančnik, Robert Ojsteršek, Tone Lerher, Borut Buchmeister, and Mirko Ficko</i>	

Systems Engineering Approach to Identify Requirements for Digital Twins Development.	82
<i>Ali Gharaei, Jinzhi Lu, Oliver Stoll, Xiaochen Zheng, Shaun West, and Dimitris Kiritsis</i>	
Manufacturing Operations Management for Smart Manufacturing – A Case Study	91
<i>Michael Meyer-Hentschel, Oliver Lohse, Subba Rao, and Raffaello Lepratti</i>	
Industry 4.0 on Demand: A Value Driven Methodology to Implement Industry 4.0	99
<i>Deborah Leone and Andrea Barni</i>	
Gamification of Operational Tasks in Manufacturing	107
<i>Makenzie Keepers, David Romero, Jannicke Baalsrud Hauge, and Thorsten Wuest</i>	
Technology Adoption in the Industry 4.0 Era: Empirical Evidence from Manufacturing Companies	115
<i>Nenad Medic, Zoran Anisic, Nemanja Tasic, Nikola Zivlak, and Bojan Lalic</i>	
Towards the Definition of an Impact Level Factor of SME Features Over Digital Transformation.	123
<i>Melissa Liborio Zapata, Lamia Berrah, and Laurent Tabourot</i>	
Industry 4.0: Maturity of Automotive Companies in Brazil for the Digitization of Processes	131
<i>Sergio Miele Ruggero, Nilza Aparecida dos Santos, José Benedito Sacomano, Antonio Carlos Estender, and Marcia Terra da Silva</i>	
General Readiness Assessment of Industry 4.0: Evidence from Serbian Manufacturing Industry	139
<i>Tanja Todorovic, Bojan Lalic, Vidosav Majstorovic, Ugljesa Marjanovic, and Nemanja Tasic</i>	
 Digital and Virtual Quality Management Systems	
Assembly Issue Resolution System Using Machine Learning in Aero Engine Manufacturing	149
<i>Jörg Brünnhäüßer, Sonika Gogineni, Jonas Nickel, Heiko Witte, and Rainer Stark</i>	

Introduction to Material Feeding 4.0: Strategic, Tactical, and Operational Impact	158
<i>Marco Simonetto and Fabio Sgarbossa</i>	

Cloud-Manufacturing

Cycle Time Estimation Model for Hybrid Assembly Stations Based on Digital Twin.	169
<i>Dimitris Mourtzis, John Angelopoulos, and Vasileios Siatras</i>	

Cyber-Physical Production Systems and Digital Twins

Digital Shadows as an Enabler for the Internet of Production	179
<i>Günther Schuh, Andreas Gützlaff, Frederick Saueremann, and Judith Maibaum</i>	
The Transformation Towards Smart(er) Factories: Integration Requirements of the Digital Twin	187
<i>S. Waschull, J. C. Wortmann, and J. A. C. Bokhorst</i>	

IIOT Interoperability

Towards Inter-Operable Enterprise Systems – Graph-Based Validation of a Context-Driven Approach for Message Profiling.	197
<i>Elena Jelisic, Nenad Ivezic, Boonserm Kulvatunyou, Scott Nieman, Hakju Oh, Sladjan Babarogic, and Zoran Marjanovic</i>	

Supply Chain Planning and Optimization

Software-Based Assistance System for Decision Support on Supply Chain Level	209
<i>Maria Linnartz and Volker Stich</i>	
Integration of Triple Sustainable Management by Considering the Multi-period Supply Chain for Next-Generation Fuel	217
<i>Waqas Ahmed, Biswajit Sarkar, and Mujtaba Hassan Agha</i>	
Potential Benefits of Reverse Blending in the Fertilizer Industry	227
<i>Latifa Benhamou, Pierres Fenies, and Vincent Giard</i>	
Effectiveness of Vendor Managed Inventory - VMI: A Study Applied in a Mining Company	237
<i>Alexandre Formigoni, João Gilberto Mendes dos Reis, Roberto Padilha Moia, Caio Flávio Stettiner, and João Roberto Maiellaro</i>	

Value Chain Integration – A Framework for Assessment	243
<i>Inger Gamme, Bjørn Andersen, Håkon Raabe, and Daryl Powell</i>	
A Dynamic Hybrid Berth Allocation Problem with Routing Constraints in Bulk Ports	250
<i>Hamza Bouzekri, Gülgün Alpan, and Vincent Giard</i>	
Blockchain-Based Secured Collaborative Model for Supply Chain Resource Sharing and Visibility	259
<i>Tarun Kumar Agrawal, Ravi Kalaiarasan, and Magnus Wiktorsson</i>	
Gripper Types and Components in Robotic Bin Picking.	267
<i>Patrik Fager, Stefano Rossi, Robin Hanson, Lars Medbo, Omkar Salunkhe, Mats I. Johansson, and Åsa Fast-Berglund</i>	
A Stochastic Model for a Two-Level Disassembly Lot-Sizing Problem Under Random Lead Time.	275
<i>Ilhem Slama, Oussama Ben-Ammar, Alexandre Dolgui, and Faouzi Masmoudi</i>	
Digital and Smart Supply Chain Management	
ERP in Industry 4.0 Context.	287
<i>Vidosav Majstorovic, Slavenko Stojadinovic, Bojan Lalic, and Ugljesa Marjanovic</i>	
Identifying the Opportunities for Enhancing the Digital Readiness Level of the Supply Chain	295
<i>Chiara Cimini, Fabiana Pirola, and Sergio Cavalieri</i>	
Intelligent Logistics Networks Management	
The Role of Last-Mile Delivery in the Future of E-Commerce	307
<i>Fernanda Alves de Araújo, João Gilberto Mendes dos Reis, and Paula Ferreira da Cruz Correia</i>	
Production-Storage and Transport Integrated Planning for a Multi-site Mining Industry	315
<i>Asma Rakiz and Pierre Fenies</i>	
Artificial Intelligence and Blockchain Technologies in Logistics and DSN	
Evaluating a Blockchain-Based Supply Chain Purchasing Process Through Simulation.	325
<i>Geraldo Jose Dolce Uzum Martins, Jacqueline Zonichenn Reis, Benedito Cristiano A. Petroni, Rodrigo Franco Gonçalves, and Berislav Andrić</i>	

Questionnaire Model for Paraconsistent Quality Assessment of Software
Developed in Salesforce 333
*Luiz Roberto Forçan, Jair Minoro Abe, Luiz Antônio de Lima,
and Samira Sestari Nascimento*

Novel Production Planning and Control Approaches

Supporting the Decision of the Order Processing Strategy by Using Logistic
Models: A Case Study 343
*Janine Tatjana Maier, Tammo Heuer, Peter Nyhuis,
and Matthias Schmidt*

Order Acceptance and Scheduling with a Throughput Diagram 351
Christopher Mundt and Hermann Lödding

Machine Learning and Artificial Intelligence

Machine Learning-Supported Planning of Lead Times in Job
Shop Manufacturing 363
Kathrin Julia Kramer, Carsten Wagner, and Matthias Schmidt

Connected, Smart Factories of the Future

Identifying Key Business Processes that Can Benefit from Industry
4.0 in the Gas Sector 373
*Nikolaos A. Panayiotou, Vasileios P. Stavrou,
and Konstantinos E. Stergiou*

The Impact of Industry 4.0 Connectivity on the Collaboration Along
Brazilian Automotive Supply Chain 381
*Nilza Aparecida dos Santos, Sergio Miele Ruggero,
José Benedito Sacomano, Antonio Carlos Estender,
and Marcia Terra da Silva*

Manufacturing Systems Engineering: Agile, Flexible, Reconfigurable

Towards a Reference Model for Configuration of Reconfigurable
Manufacturing System (RMS). 391
*Erica Capawa Fotsoh, Nasser Mebarki, Pierre Castagna,
Pascal Berruet, and Francisco Gamboa*

Automatic Design of Dispatching Rules with Genetic Programming
for Dynamic Job Shop Scheduling 399
Salama Shady, Toshiya Kaihara, Nobutada Fujii, and Daisuke Kokuryo

A Literature Review on the Level of Automation and New Approach Proposal	408
<i>Hasnaa Ait Malek, Alain Etienne, Ali Siadat, and Thierry Allavena</i>	
De-risking Investments in Industrial Systems Using Real Options Analysis: Case of Phosphates Fertilizer Firm	418
<i>Imane Essaadi and Richard de Neufville</i>	
Data-Driven Replenishment Method Choice in a Picking System	427
<i>Simon Hummelshøj Sloth, Magnus Abildsten Bøgh, Christian Møller Nielsen, Konstantinos Panagiotis Konstantinidis, and Inkyung Sung</i>	
Business Process Management for MES Deployment: Some Lessons from a Bearings Manufacturer Experience	433
<i>Hervé Verjus, Vincent Clivillé, Lamia Berrah, Romain Gandia, and Claude Chapel</i>	
An Application of a DSML in Industry 4.0 Production Processes	441
<i>Marko Vještica, Vladimir Dimitrieski, Milan Pisarić, Slavica Kordić, Sonja Ristić, and Ivan Luković</i>	
Towards an Industry-Applicable Design Methodology for Developing Reconfigurable Manufacturing	449
<i>Alessia Napoleone, Ann-Louise Andersen, Thomas Ditlev Brunoe, Kjeld Nielsen, Simon Boldt, Carin Rösiö, and David Grube Hansen</i>	
Reconfigurable Manufacturing: Lesson Learnt from the COVID-19 Outbreak	457
<i>Alessia Napoleone and Lorenzo Bruno Prataviera</i>	
Digital Assistance Systems: Augmented Reality and Virtual Reality	
Virtual and Augmented Reality as a Digital Support to HR Systems in Production Management.	469
<i>Danijela Lalić, Dunja Bošković, Bojana Milić, Sara Havzi, and Jelena Spajić</i>	
Application of Virtual Reality Technologies for Achieving Energy Efficient Manufacturing: Literature Analysis and Findings.	479
<i>E. G. Nabati, M. T. Alvela Nieto, A. Decker, and K.-D. Thoben</i>	
Smart Products in Smart Manufacturing Systems: An Opportunity to Utilize AR?	487
<i>Joshua Gross and Thorsten Wuest</i>	
Evaluation of Augmented Reality in Industry	495
<i>Tone Lise Dahl, Manuel Oliveira, and Emrah Arica</i>	

Circular Products Design and Engineering

- Finding and Capturing Value in e-Waste for Refrigerators Manufacturers and Recyclers 505
Clarissa A. González Chávez, Mélanie Despeisse, Björn Johansson, and David Romero

Circular, Green, Sustainable Manufacturing

- Sustainable Business Model Innovation in the Furniture Supply Chain: A Case Study 515
Mikhail Shlopak, Bella B. Nujen, and Jon Halfdanarson
- A Basic Study on Scheduling Method for Electric Power Saving of Production Machine. 524
Masayuki Yabuuchi, Toshiya Kaihara, Nobutada Fujii, Daisuke Kokuryo, Satoko Sakajo, and Yoshito Nishita
- Sustainability in Fabric Chains and Garments for a Circular Economy 531
Solimar Garcia, Irenilza de Alencar Nääs, Pedro Luiz de Oliveira Costa Neto, João Gilberto Mendes dos Reis, Valdice Neves Pólvara, Luiz Antonio de Lima, Angel Antonio Gonzalez Martinez, and Vanessa Santos Lessa
- Planning Environments of Hospital Laboratories: An Exploratory Study. 538
Aili Biriita Bertnum, Marco Semini, and Jan Ola Strandhagen
- Knowledge and Practices Towards Sustainability and Circular Economy Transitions: A Norwegian Manufacturing Perspective 546
Jon Halfdanarson and Nina Pereira Kvadsheim
- A Methodology to Integrate Sustainability Evaluations into Vendor Rating. . . 554
Alessandro Fontana, Silvia Menato, and Andrea Barni

Environmental and Social Lifecycle Assessments

- Travel-Times Analysis and Passenger Transport Disutilities in Congested American Cities: Los Angeles, New York, Atlanta, Austin, and Chicago 565
Helcio Raymundo and João Gilberto M. dos Reis

Socio-Cultural Aspects in Production Systems

- The Interdependencies of Quality Management, Knowledge Management and Innovation Performance. A Literature Review. 575
Marina Zizakov, Stana Vasic, Milan Delic, Marko Orosnjak, and Srdjan Vulcanovic

Insights from a Top-Down Lean Subprogram Deployment in a Production Group: A Tactical Perspective	583
<i>Sara Linderson, Monica Bellgran, and Seyoum Eshetu Birkie</i>	
Tools for Evaluating Human Factor Aspects in Production and Logistics System.	591
<i>Vivek Vijayakumar and Fabio Sgarbossa</i>	
Economy and Its Symbiosis with Circularity.	599
<i>Abelino Reis Guimarães Neto, Rodrigo Rodrigues, Jacqueline Zonichenn Reis, Julio Cesar Raymundo, and Rodrigo Franco Gonçalves</i>	
Data-Driven Manufacturing and Services Operations Management	
First Steps to the Digital Shadow of Maintenance Services' Value Contribution	609
<i>Frederick Birtel, Achim Kampker, and Volker Stich</i>	
Reshoring of Service Operations: Evidence from a Delphi Study.	617
<i>Paolo Gaiardelli, Albachiara Boffelli, Matteo Kalchschmidt, Daniel Bellazzi, and Simone Orom Samorani</i>	
Digital and Physical Testbed for Production Logistics Operations	625
<i>Jannicke Baalsrud Hauge, Masoud Zafarzadeh, Yongkuk Jeong, Yi Li, Wajid Ali Khilji, and Magnus Wiktorsson</i>	
Principles and Research Agenda for Sustainable, Data-Driven Food Production Planning and Control.	634
<i>Maggie Bresler, Anita Romsdal, Jan Ola Strandhagen, and Olumide E. Oluoyisola</i>	
Product-Service Systems in DSN	
Agile Guideline for Development of Smart Services in Manufacturing Enterprises with Support of Artificial Intelligence	645
<i>Mike Freitag and Oliver Hämmerle</i>	
Collaborative Design and Engineering	
Framework for Identifying Gripper Requirements for Collaborative Robot Applications in Manufacturing	655
<i>Omkar Salunkhe, Patrik Fager, and Åsa Fast-Berglund</i>	
A Novel Value Driven Co-creation Framework.	663
<i>Geir Ringen, Halvor Holtskog, and Torgeir Welo</i>	

Autonomous Mobile Robots in Hospital Logistics 672
*Giuseppe Fragapane, Hans-Henrik Hvolby, Fabio Sgarbossa,
and Jan Ola Strandhagen*

Interorganizational Learning in Manufacturing Networks 680
Geir Ringen, Frode Paalsrud, and Eirin Lodgaard

Author Index 687
