Tables du cadastre, volume 5b (D. Roegel, 2010)

Introduction

This volume gives the logarithms of the numbers from 100000 to 125000 with 14 places, and four to six levels of differences. The exact values of the logarithms and differences are given for the values $200k$ written at the top of the pages. All other values are interpolated and are approximations of the values found in Prony's tables.

For more information on the *Tables du cadastre* and on our reconstructions, see

Denis Roegel, *The great logarithmic and trigonometric tables of the French Cadastre: a preliminary investigation*, Technical report, LORIA, 2010.
