HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

SADCO Aerospace Applications of Control & Optimisation Workshop Paris, March 2nd 2011

Presentation of Astrium Space Transportation

Gérald Pignié, CTO Office,

Head of the Technology Innovation Program

ASTRIUM Space Transportation, March 2nd 2011

All the space you need

Astrium: part of EADS, a global leader in aerospace and defence

EADS

Astrium at work

Astrium is a global space industry leader, with world-class expertise and extensive prime contractorship experience across all sectors of the space business

Facts & Figures 2009

Employees: 15,000
Sites: F, G, UK, S, NL
Turnover: €4.8 billion
Order backlog: €14.7 billion
CEO: François Auque

Employees per country

Astrium: the heritage and expertise of the leading European space nations

Additional locations	France
	Limeil-Brévannes (Sodern)
	Germany
	Backnang (Tesat)
	Potsdam (Infoterra)
	UK
	Colerne (Paradigm)
	Corsham (Paradigm)
	Farnborough (Infoterra)
	Guildford (SSTL)
Hawthorn (Paradigm)	
Leicester (Infoterra)	
Newcastle (Infoterra)	
Oakhanger (Paradigm)	
Spain	
Barcelona (Infoterra)	
Saudi Arabia	
Riyadh (GPT)

Astrium's activities are based in three key areas

Astrium Space Transportation

The European prime contractor for civil and military space transportation and manned space activities

Astrium Satellites

A world leader in the design and manufacture of satellite systems

Astrium Services

At the forefront of satellite services in the secure communications, geo-information and navigation fields

Astrium: an integrated company

Astrium Space Transportation

- The European prime contractor for space transportation, orbital infrastructure and manned space

CEO: Alain Charmeau

Business Divisions:

- Launchers
- Defence
- Orbital System & Space Exploration
- Propulsion & Equipment

Access to space

- Without launchers, no space activity would be possible

Astrium provides Europe with a full, flexible launch capability

- Ariane 5
- Soyuz
- Rockot

A safer world

- Space systems have become key factors in defence and security systems. Astrium provides Space Defence systems, technologies and services.

ASTRIUM ST works on :

- Ballistic Missiles
- Future Space Defence Systems
 - Ballistic Missile Defence
 - Space Police
 - Space debris removal

Man in space

- The International Space Station (ISS) is an uplifting example of international co-operation and ambition not only for advances in space technology and engineering, but also for all kinds of scientific research

Astrium is leading the European contribution to this project and was selected by ESA as prime contractor for major elements

- Columbus laboratory
- Automated Transfer Vehicle ATV
- Operation & utilisation

Exploring the Universe

- From his earliest days, Man has been fascinated by the stars above

Astrium's technology enables us to explore the solar system and the secrets of the Universe

- Earth & Sun
- Planetary missions
- The wider Universe

Home funded R&T/D Program at ASTRIUM-ST

- The yearly home funded ASTRIUM-ST R&T/D Program gets a budget higher than 40 millions €, shared between France and Germany
- It is organised around five major flagship pluri-annual projects, so called the “Top Five”, receiving the biggest budgets, and several smaller projects (also plurianual), called “STEP”.
- The time frame for projects is typically 3 to 5 years.

Set of R&T/D STEP Projects

AITS

Antenna Reflectors & Satellite Structures & Inflatable

Propulsion Energy Optimisation Management

Complex System Architecture / Picsar (incl. ATM ITB)

Dispensers

High Pressure Tanks

Human spaceflight avionics evolution

Infrastructures Safety

ISS Evolution

Metallic Structures Technologies

Missile Defence

New Generation Launcher

NEO deflection

Planetary Exploration Technologies

Propulsion Technologies

Pyrotechnic Systems

Re-entry Technologies

Robustness & Margin Knowledge

Software Engineering

Space Electric & Electronic Engineering

Special France Projects / Deterrence

Test, Control, Metrology

Thermoplastic Technologies

Upper stage

Virtual Products & System Engineering

Partnerships with Universities & Labs

- To support Technology & Engineering Innovation, ASTRIUM ST has set up a large network of scientific partners, from the academic community, in many scientific domains.
- This network is flexible, and our will is to extend it, according to the evolution of our needs.

Research & Partnerships in Mathematics

- In the domain of mathematics, we have already some partnerships, covering at least partly the topics presented in the following pages
- We are actively working on these topics as they are key for most of our major future programmes
- For some very innovative topics we are using the support of EADS Innovation Works research centre (IW)

This document and its content is the property of Astrium [Ltd/SAS/GmbH] and is strictly confidential. It shall not be communicated to any third party without the written consent of Astrium [Ltd/SAS/GmbH].

Brief overview of our needs in Mathematics (1)

- **Modelling & Simulation in Physics / Multi-physics:**
 - Large scale structures modelling
 - Fluids/structures interactions
 - Acoustics (acoustic at lift off, launchers blast wave modelling, ...)
 - Fluid mechanics (Aerothermodynamics of complex shapes, hot hypersonic flows, for Earth and planets entry/re-entry, unstationary flows modelling : buffeting, in transsonic regime, ...)
 - Thermal Modelling & Thermal Control of various spacecrafts (cryogenic propelled launchers, orbital S/C, re-entry vehicles, ...)
 - Electromagnetism Modelling in a very wide band of frequencies (for Antenna Design, Radar Cross Section Assessment, Electromagnetic Compatibility (EMC), hardening to Lightning, ...)
 - Transient phases modelling: stages separations, jettisoning of fairings and payloads, ...)
 - Fast dynamics (impact of debris on space structures,)

Brief overview of our needs in Mathematics (2)

■ Stochastic Modelling

- Participation to the development of a common collaborative platform on uncertainties management: OPENTURNS: probabilistic and statistic toolbox (EADS, PHIMECA). Uncertainties management mastery is key for a Platform Integrator !
- New methods for enhanced stochastic simulation (Stratified Monte-Carlo, surfaces of response, particular approximation, sensitivity indices based methods, ...): How to get more confidence with smaller data drawings ?
- Modelling for quantitative methods in Reliability, Availability, Maintainability and Safety (RAMS)

■ Signal & Image Processing

- Images & Data fusion for space mission: hazard assessment and hazards/obstacle avoidance
- Discrimination of objects, for applications in defence, security, ...

Brief overview of our needs in Mathematics (3)

- **Navigation, Guidance, Control & Missions Analysis**
 - Optimisation methods (functional & parametric methods)
 - New filtering methods for navigation (particular filtering)
 - New guidance methods (differential games, neural networks, tuning of guidance laws using genetic algorithms...)
 - **Systems & Control Theory: Robust control methods (H_∞ , μ -synthesis, LMI, LPV, robustness analysis: sum of square, IQC, optimisation methods for analysis & control synthesis...), Non-linear control (dynamic inversion, hybrid control, ...)**
 - Convex analysis for actuators selection
- **Computer Science & System Engineering**
 - Formal semantics of modelling & programming languages
 - Analysis & formal proof of Software (static analysis - abstract interpretation, model checking, and theorem proving)
 - Model Based System & Software Engineering

Questions & Answers

Any questions?

We would be happy to answer them!
