Submitted on 2 Oct 2018

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Tools and standards to make neuroimaging derived data reusable

3.

Transparency

Disclosing analytical details

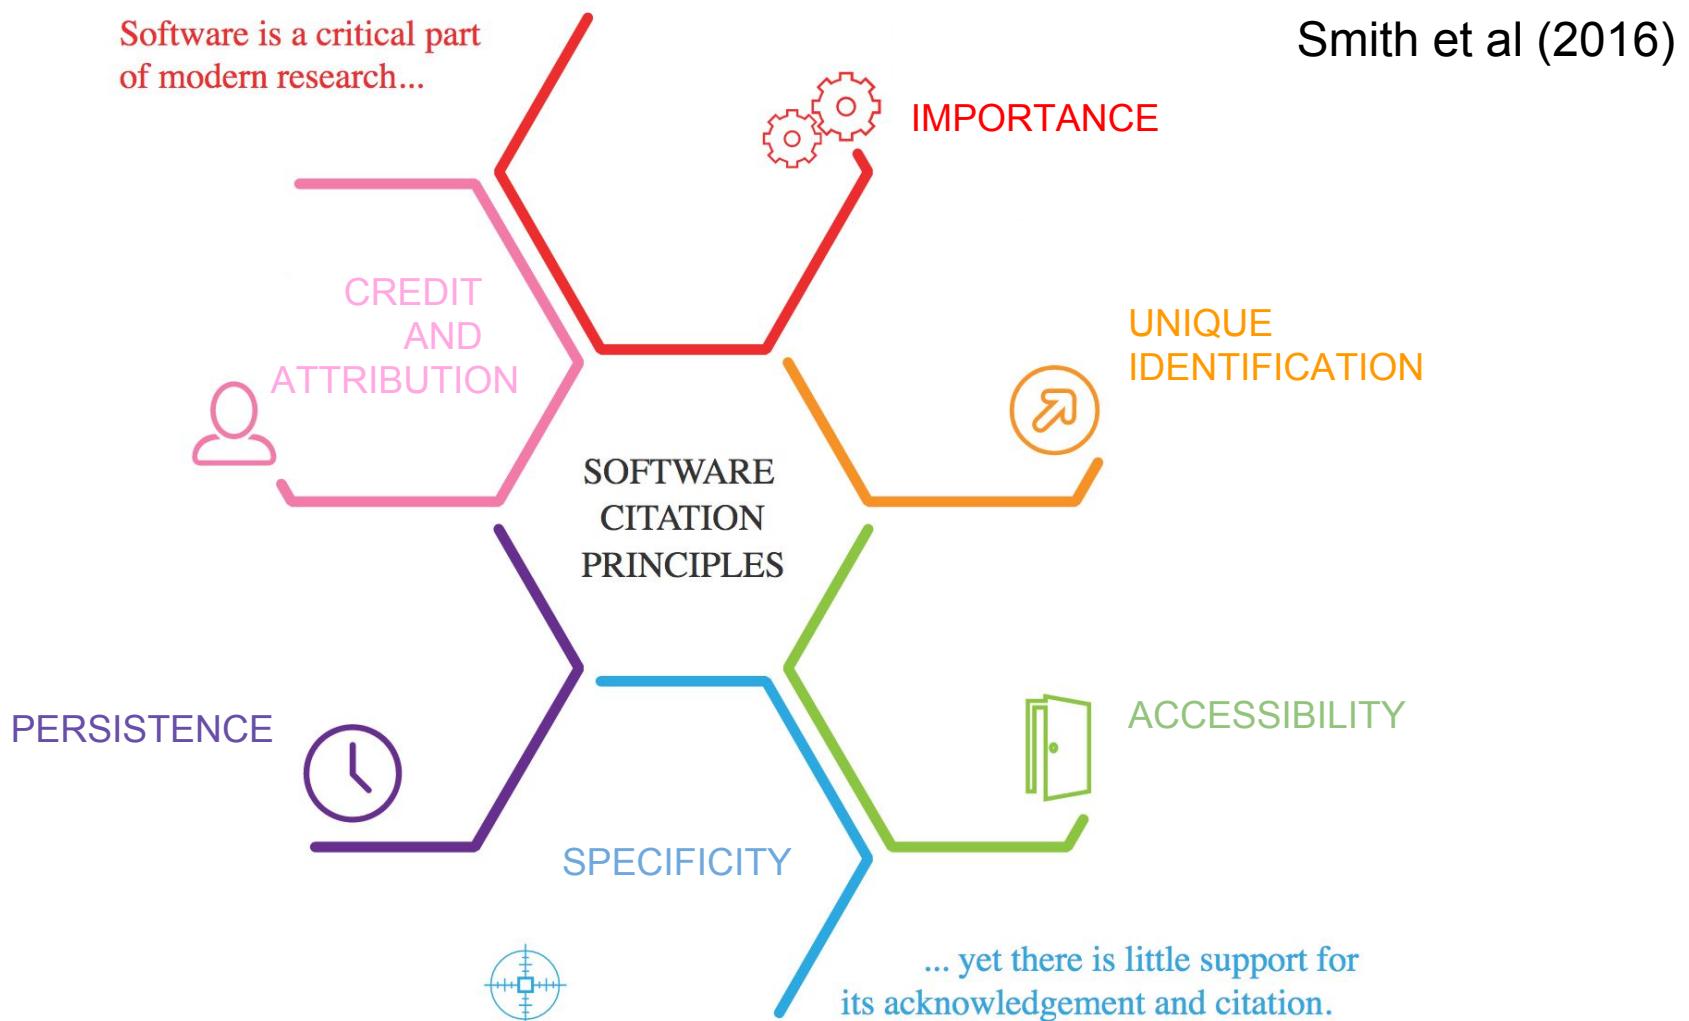

Details about the analysis pipeline are in the code.

In manuscripts, it is best practice to:

- Cite custom code
- Cite libraries and tools

How to cite software? The software citation principles

Citing custom code

3. Results

Bowring et al (2018)

[...] All analysis scripts, results reports, and notebooks for each of study are available through Zenodo (Nielsen and Smith, 2014) at <https://zenodo.org/record/1203654> (Alexander Bowring et al., 2018).

Persistence

Accessibility

The screenshot shows the Zenodo website interface. At the top, there is a blue header bar with the Zenodo logo, a search bar, and navigation links for 'Upload' and 'Communities'. On the right side of the header are 'Log in' and 'Sign up' buttons. Below the header, the date 'May 17, 2018' is displayed. The main content area features a project card for 'NISOx-BDI/Software_Comparison: Version 0.2'. The card includes the project title, authors (AlexBowring; Camille Maumet; Thomas Nichols), and a note that 'No description provided.' A 'Preview' button is located at the bottom left of the card. To the right of the project card, there is a box titled 'Available in' containing the GitHub logo.

Software Heritage

Let others cite your code

The screenshot shows a Zenodo software comparison page for "NISOx-BDI/Software_Comparison: Version 0.2". The page includes a search bar, upload and communities links, and log in/signup buttons. The main content area shows the publication date (May 17, 2018), a green "Open Access" button, and a note that no description is provided. A large orange box highlights the word "Attribution". Below this is a file listing for "Software_Comparison-0.2.0.zip" containing various scripts and CSV files. A green box highlights the DOI "10.5281/zenodo.1203654" under "Related identifiers". A blue box highlights the word "Specificity" next to the "Versions" section, which lists "Version 0.2" and "Version v0.1". A red box highlights the "Cite all versions?" note at the bottom.

Also applies to other (non-neuroimaging) tools, repositories and libraries...

2.5 Scripting of analyses and figures

Bowring et al (2018)

A Python Jupyter Notebook (Kluyver et al., 2016) was created for each of the three studies. Each notebook harvests our results data from Neurovault (RRID:SCR_003806) and applies the variety of methods discussed in the previous section using NiBabel 2.2.0 (Brett et al., 2017), NumPy 1.13.3 (Walt et al., 2011) and Pandas 0.20.3 (McKinney and Others, 2010) packages. Figures were created using Matplotlib 2.1.0 (Hunter, 2007) and Nilearn 0.4.0 (Abraham et al., 2014).

One step further: linking it all together!

“Gather, view and monitor all research outcomes”

The screenshot shows the OpenAIRE CONNECT homepage with three main sections:

- European Marine Science**: Features a brain icon, a "RESEARCH COMMUNITY" button, and a "SUBSCRIBE" button.
- Neuroinformatics**: Features a brain icon, a "RESEARCH COMMUNITY" button, and a "SUBSCRIBE" button.
- Digital Humanities and Cultural Heritage**: Features a stylized geometric logo, a "RESEARCH COMMUNITY" button, and a "SUBSCRIBE" button.

At the bottom, there are social media links (Facebook, Twitter, LinkedIn, YouTube), a footer menu (About, News - Events, Blog, Contact us), the OpenAIRE logo, a European Commission logo, and a license notice about CC BY.

One step further: linking it all together!

“Gather, view and monitor all research outcomes”

The screenshot shows the OpenAIRE CONNECT interface for a group named "Neuroinformatics". At the top, there is a navigation bar with a brain icon, the group name "Neuroinformatics", and links for "Search", "Monitor", "Share", "Link", "Sign in", and "SUBSCRIBE". Below the navigation bar, the group name is repeated twice. A horizontal bar contains various research topics: BRAIN MAPPING, BRAIN IMAGING, ELECTROENCEPHALOGRAPHY, ARTERIAL SPIN LABELLING, BRAIN FINGERPRINTING, BRAIN, NEUROIMAGING, MULTIMODAL BRAIN IMAGE ANALYSIS, FMRI, and NEUROINFORMATICS. There is also a "show more" link. Below this, it says "Curated by: sorina.pop, camille.maumet, christian.barillot" and "Created: 18-04-2018 Members: 4". A summary section shows statistics: 87 publications, 1 research data, 0 software, 10 projects, and 5 content providers. Below this, there are three sections: "Recent publications", "Recent research data", and "Recent software". The "Recent publications" section lists a paper titled "TOWARDS INTEGRATING SPATIAL LOCALIZATION IN CONVOLUTIONAL NEURAL NETWORKS FOR BRAIN IMAGE SEGMENTATION" from 2018, with an "UNKNOWN" status and an "OPEN" button. The "Recent research data" section lists a paper titled "BROCCOLI: SOFTWARE FOR FAST FMRI ANALYSIS ON MANY-CORE CPUs ANDGPUS" from 2014, with an "OPEN" button. The "Recent software" section has a "No results found" message. On the far right, there is a "feedback" button.

Many ways to contribute

You can...

- Make your research outputs available and citable
- Cite existing software
- Use derived data standards and tools
- Contribute to the development of new specifications and their ecosystems
- Make datasets in neuroimaging data repository discoverable
